

INSTALLATION INSTRUCTIONS

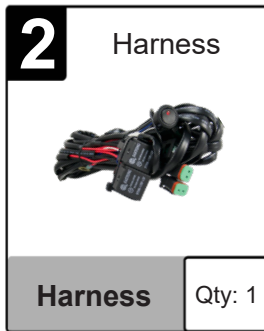

VxSPEC UPGRADE VEHICLE SPECIFIC LIGHTING

'18+ JEEP JL / JT (GLADIATOR) LIGHTING KIT

INSTALLATION INSTRUCTIONS

Included in Jeep JL/Gladiator Light Kit

KIT SPECIFICATIONS

1. Warranty : Extended
2. Amp Draw : 3.5A @ 12V DC (Kit)
3. Input Voltage : 9-32V DC
4. Beam Patterns : 10° Broad Spot
5. LED Lifespan : 50,000 Hours

MOUNTING INSTRUCTIONS

1. Remove 3 bolts with the T45 Torx Bit. (Fig.1)
2. Install bracket with supplied spacers and bolts. Spacers drop into the bolt cavities, hold bracket in place and secure with supplied bolts and washers. Repeat on opposite side.
3. Mount lights to brackets.

Figure 1.

WIRING DIAGRAM**WIRING INSTALLATION INSTRUCTION**

1. Find a suitable place to mount Relays Part (R1 & R2) leaving enough room for Power & Ground wires Part (W1,W2,W3,W4) to reach the battery & the Deutsch connectors Part (C1 & C2) to reach the lights. Mount Relays.
2. Run Power wires (W1, W3) & Ground wires (W2, W4) to the battery. Connect the Power wires (W1, W3) to the Positive (+) battery terminal and connect the Ground wire (W2, W4) to the Negative (-) Battery Terminal.
3. Run the Deutsch Connector wiring, (C1 & C2) to each light and plug in. It doesn't matter which Deutsch Connector plugs into which light.
4. Disconnect the Switch Part (S1) at the white Plug Part (P1) and run the wire through the vehicles fire wall to desired mounting location inside the Cab, [using a factory rubber or plastic grommet is suggested].
5. Drill the hole to the required size for the Switch (S1) and mount to desired position.
6. Reconnect the Switch (S1) to the Harness.
7. Test Light.
