Delock USB Dual Docking Station for 2 x SATA HDD / SSD with Clone Function and Card Reader + additional USB Port

Description

This docking station by Delock enables an external connection of up to **two 2.5″ or 3.5″ SATA HDDs or SSDs** through the USB interface. This solution does not require an external enclosure since the drive can be plugged into the docking station directly. Furthermore the **clone function** enables to copy the content of one HDD to another without using a PC.

Integrated Card Reader
In addition, the docking station with integrated card reader expands a PC or laptop by an **SD and a Compact Flash** slot via the USB connection.

Additional USB Type-A port
Thanks to the additional USB Type-A female, no USB socket is blocked on your computer, because it can still be used for USB memory or other USB devices.
