Full product range & more information: www.lumenalights.com

- A length of 12v 2 core rubber cable is supplied with a VERSA 2 pin male plug (H05RN-F may vary).
- Push the plug firmly into the female adaptor of the Transformer or splitter.
- Screw the attached threaded cap to the female adaptor to create a secure connection.
- If a splitter is used, ensure a waterproof cap is used to cover any unused terminals.
- Unscrew the head carefully and install MR16 bulb into the bulb holder via the guide clip (push).
- Carefully place the rubber seal between the body and head to ensure a waterproof seal and screw on head securely.

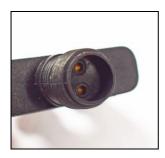

NOTES:

- To ease with head / body assembly, a small amount of oil such as '3 in I' can be applied to the neck thread.
- If the head is accidentally cross-threaded when securing to the body, turn anticlockwise and try again – it should then screw on easily.
- Product base is fixed to the main part of the light. 4 x Anchor bolts can be used to fix the product to the relevant surface (not supplied).
- The rubber seal supplied must be installed between the head and the body and MUST NOT be twisted to ensure a waterproof connection.
- Photocell versions photocell is factory pre-set and cannot be changed.
- The head of the product is heavy (up to 3kg) handle with care
