## LED Solar Street Light

LOT-SOL-20-1

# Product Description

The LED Solar Street Light is part of the new wave in lighting technology. This eco-friendly light fixture is used in commercial plazas, university campuses, city centers, residential communities, roadways, and public gardens to provide quality lighting without wasting unnecessary electricity. The monocrystalline solar panel is in-laid directly in the top of the fixture and works with a 17AH Lithium Battery to provide hours of working time. Optional built-in camera available.

Product Number	LOT-SOL-20-1
Wattage	20W/ 30W/ 40W
Lumen Output	2400/3600/4800
Power	18V 50W monocrystalline solar panels
Solar Charging Time	6-7 Hours in bright sunlight
CCT	3000k/4000k/5000k
IP Rating	IP65
Material	Aluminum alloy + PC lens
Certifications	CE, RoHS.
