

TL-AL100-CB

12 VOLT ACCENT LIGHT

The TL-AL100 accent light is used for a variety of applications like walls, boulders, exterior walls, hedges, and other large, flat architectural elements. This fixture is ideal for areas that require wide spread light with a wide, soft, even glow that needs to bring out the small details without overpowering the overall scene.

This professional-grade adjustable wall wash fixture floods areas with an even amount of light at the optimal angle. A frosted lens can be added to soften the effect even further. The shape of this floodlight shows off clean, crisp lines that fit into any type of landscape. Overall, this Total Light fixture promises a lifetime of beautiful ambient lighting.

The way this figure beautifully yet precisely delivers light does not effect the exceptional quality of the product. The solid brass construction is extremely durable and promises protection from water, humidity, dirt, pests, and other environmental hazards. Compatible with almost any LED G4 lamp, this floodlight works with existing low voltage landscape lighting systems.
