

# TL-PL-8-15-CB

12 VOLT PATH LIGHT

This simple, yet elegant TL-PL-8-15 path light can be used to illuminate steps, sidewalks, garden pathways, driveways, patios, plant beds, and boulders – to name a few. This fixture outputs the perfect amount of light every time, casting a soft glow on any desired area. The underside of the shade is coated with ceramic white paint for even light distribution. The slightly larger 8" shade casts light on a larger area, and the larger area also allows for slightly softer light.

The functional design of this path light precisely directs the light to the desired area while minimizing glares and unwanted light. This allows for installations that promote safety through a residential or commercial landscape. While lighting usable, high-traffic areas, this path light simultaneously creates dramatic, intriguing effects on stone paths, boulders, and plant beds.

The TL-PL-8-15-CB path light upholds Total Light's superior quality standard. The solid brass construction is extremely durable and withstands extreme outdoor conditions. Compatible with almost any LED G4 lamp, this light works with any existing low voltage landscape lighting system.

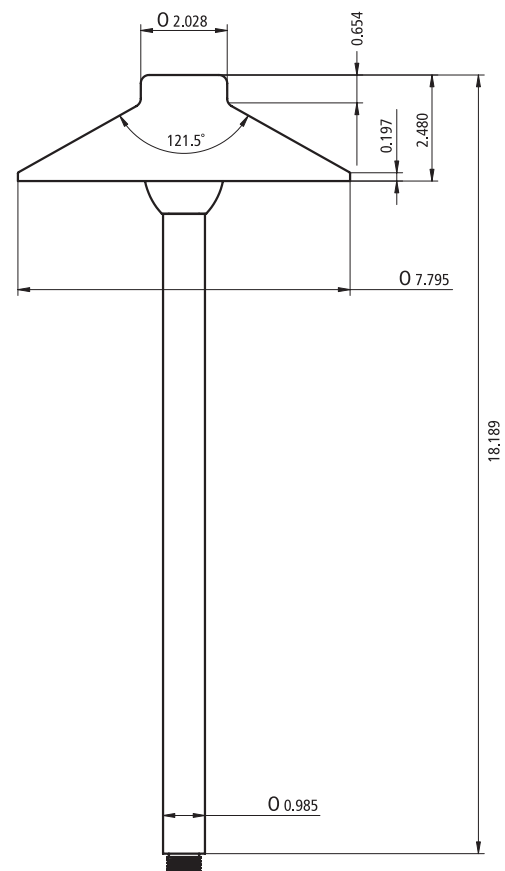

## SPECIFICATIONS
