J		Hex Wrench	1
K		Wrench	1

Important information:

1. To install the bench you had better find a helper.
2. Please don't tighten the screws too firmly at first, screw them manually until you can't go forward. After installation, you need to go back and fasten all screws securely.
3. To make the installation easier, please install the screw head on the outside of the product, and the end with thread inside.
4. To prevent the product from rusting, the surface of the frame has been processed by plastic spraying technology. It is recommend that the product not be exposed in a humid environment for a long time, or it will shorten the service time.
5. We use anti-skid screws to prevent the screws from loosening easily, but for safety we recommend that you check the screws regularly and tighten them.
6. The product contains small parts, please keep children away when installing.

Installation Steps

Install seat and armrest first.

NOTE: Please distinguish the front from the back side of the seat before installing. The smoother and flatter side is the seat front.

Install the backrest.

NOTE: The front side is smoother and flatter.

Installation Steps

Use the wrench to hold the nut, and use screwdriver to tight on the other side.

Then put the Anti-rust Caps on the screws.

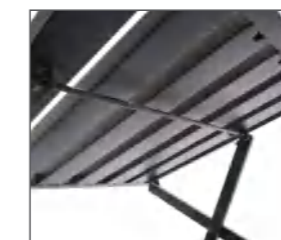

How to Use the Middle Table

1.Lift the middle table.

2.Hold the metal bar and life it.

4.Finished!

3.Put the metal bar in the hooks on both sides of the middle table.
