**Step two:**  
Simply puff to start your vaping experience.

Compact design for your pocket

Optimum taste. Intense taste

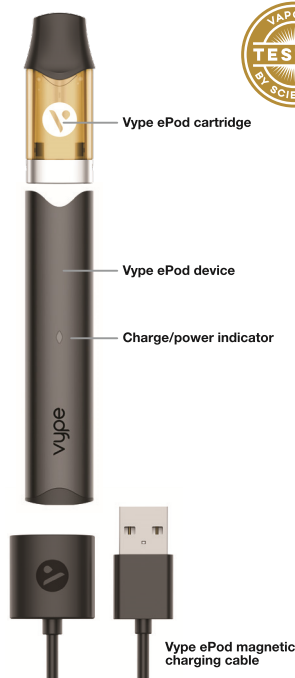

One click magnetic charger

Read before use.  
Keep the user guide for future reference.

### Know your Vype ePod

### Tips

- Each Vype ePod cartridge is designed for single use. You should not attempt to refill as this may lead to leakage and damage your device.
- All Vype eLiquids have been developed bespoke to Vype devices for an optimal vaping experience.
- For optimum enjoyment and satisfaction, it is recommended to close your lips over the cartridge so the tip is inside your mouth, not resting directly on your lips.
- To begin your vaping experience, puff on the Vype ePod cartridge.
- When the Vype ePod is activated, the green LED will appear.
- When your puff ends, the green LED will gradually disappear.
- Only use Vype ePod cartridges with the Vype ePod device.

### How to use your Vype ePod

- For optimal performance, your Vype ePod should be fully charged before first use.
- Remove the Vype ePod cartridge from the blister pack before connecting it onto the Vype ePod device. The magnet will pull the cartridge into place.

### When to change your Vype ePod cartridge

- It's time to change your Vype ePod cartridge when:
- You notice a deterioration in the

- taste or quality of the vapour.
- Your Vype ePod stops producing vapour.
  - If your Vype ePod stops producing vapour and the cartridge is not yet empty, check that your device is fully charged.

### Device charging indicators on your Vype ePod

When the green LED flashes 10 times, it is time to charge your device. Your Vype ePod device may run out of charge before the Vype ePod cartridge is finished so don't automatically discard the cartridge when charging the device as there may be eLiquid in it.

### How to charge your Vype ePod

- To charge your Vype ePod, place the device into the charging cable supplied with your Vype ePod kit. The magnet will pull the device into place.
- Connect the other end of the USB charging cable to the USB port of a computer.
- When charging, the green LED on the Vype ePod will appear.
- When the LED disappears, the Vype ePod is fully charged and the magnetic charging cable should be disconnected.
- It should take about 80 mins to fully charge your Vype ePod device.
- To avoid the risk of fire, injury and/or damage to your Vype ePod or other property, only charge your Vype ePod with the equipment

- provided in your Vype ePod kit or with compatible Vype charging accessories.
- Never leave your device unattended while it is charging.
  - Rating input of magnetic charging cable: 5VDC, 450mA.
  - This product should only be connected to a safety extra-low voltage (SELV) circuit rated at 5VDC, 1A.

Using an AC adaptor with a current output lower than this will result in a slower charge time.

- The device has an overvoltage, overcurrent and a short-circuit protection function.

### Important product use information

- Vype ePod contains a non-replaceable lithium-ion polymer rechargeable battery.
- The nicotine level of the product may have changed from the time of manufacture and it may be less than the nicotine level indicated on the product.
- Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children.
- The build-up of dirt inside your Vype ePod cartridge and the top of your device may prevent you from enjoying
