WARRANTY INFORMATION

Ontario Knife Company® prides itself for its over 130 years of quality manufacturing. OKC products manufactured in the United States are backed by a limited lifetime warranty; if any of our Made in the U.S.A. products fail due to their structural integrity, not including cosmetic damage due to use, we will repair or replace it free of charge with the same item or an item of equal value. The structural build, not including cosmetic damage from use, of OKC International and globally sourced products are backed by a one-year limited warranty. All warranties exclude products subject to abuse, misuse, modification or neglect.

▶ OLD HICKORY® OUTDOOR MACHETE

The new compact Old Hickory Machete retains the classic look of the Old Hickory line with an American walnut handle and traditional brass cutlers rivets. The handle incorporates a “bird’s beak” butt which anchors the handle and allows the machete to rotate around the pinky for effective cutting with just a flick of the wrist.

▶ BLACK BIRD S35VN

The follow-up to the Black Bird ML5 is the Black Bird S35VN. The biggest differences here are steel choice, the ML5 was made with 420HCSS whereas this option has S35VN steel construction. Staying with the micarta handle material, the color choice has changed for this knife, moving to a more tactical look with black scales. Nylon sheath is MOLLE compatible.

▷ RAT®-6

RAT Fixed blades have proven themselves to be some of the most field ready knives you can add to your collection, The RAT 6 is no exception. Measuring in at 5.5" in blade length with a deep finger choil, RAT standard micarta handle scales, full S35VN steel tang construction, this knife has the capabilities of a large chopper and detail knife in one due to its vast blade length sweeping into a piercing tip.

▷ RAT[®]-3 GOBAR / UTILITY

Compact sizing can be a huge advantage in a knife, the RAT 3 has shown that time and time again. These new blade patterns are coupled with the RAT 3 handle shape, giving them a great lightweight carry feel and low profile. The Gobar is a chisel style knife with 3.5" of straight cutting surface and additional flat chisel head. The Utility has a slightly curved belly and flat chisel head, larger finger choil for greater control while executing those workman tasks. Both items come with a MOLLE compatible, belt-loop style, nylon sheath for easy carrying no matter where you decide to use them.

▷ RAT®-3 SKINNER / CAPER

These new blade patterns are coupled with the RAT 3 handle shape as well and focus more on hunting and field dressing. The Caper has additional space on the neck to move your thumb up for more detail control along with a large finger choil for optimal comfort. The Caper also comes with a molded leather, belt-loop style sheath providing a tight fit and low profile carrying. The Skinner has a big belly with great curvature for skinning game or providing support in those small chopping tasks and is coupled with a full blade, leather sheath with retention strap and belt-loop style carrying.

▶ OKC[®] *HIKING KNIFE / CAMP PLUS HATCHET*

Traveling the trails means trusting your equipment and this lightweight piece comes in at only 5.6oz, 7.2oz in the sheath, which means the OKC[®] Hiking Knife won't add any unwanted weight to your belt or pack. A cross between bushcraft and tactical, the Camp Plus hatchet offers the best of both worlds. Just shy of a 3 inch cutting surface and forward weighted for great chopping momentum, this tool isn't just comfortable in hand but strong.

TAK 2® / ADK SERIES

With the TAK 2® we have gone beyond simply creating a new item, we've created a knife and handle combination that exudes comfort and a reality that you're getting even more from an already dominant fixed blade series. The ADK hunters are named for the long hunting, trapping and fishing tradition that is associated with the Adirondack Mountains of New York State. Each knife has micarta handles and leather sheaths, sure to become part of your own hunting traditions.

OKC[®] BESRA / Ti22 ULTRABLUE

The OKC[®] Besra is the brother to the OKC[®] Shikra. Some slight differences to the handle profile and a new blade shape set these two apart. Maintaining the same construction materials with a linen micarta scale, titanium frame lock and AUS8 stainless steel blade with black PVD coating. With a handle and frame lock completely constructed of a high-grade material like Titanium you can trust that the Ultrablue will be as dependable as it is colorful. An iridescent oxidation, the handle's color shifts from a deeper blue to a purple similar to an Ultraviolet hence the name Ultrablue.

OLD HICKORY[®] OUTDOOR SLIP JOINT FOLDER

The Old Hickory Outdoor Slip Joint folder isn't just a new addition to the Old Hickory outdoor lineup, this folder represents a new horizon for Ontario Knife Company. Fully manufactured and built in Franklinville, NY where OKC is based, the OH-O Folder is proudly one hundred percent American made. The folder is built with carbon steel, brass liners, and walnut handle scales. Traditionally OKC would reserve USA made items to their fixed blade collections and importing their folder selections. The Old Hickory & Old Hickory outdoor lines are proud banners boasting domestic production, so when the idea of adding a folder to the OH-O lineup was brought to the table it was clear that to maintain the standard of the line this folder would have to be fully USA made. Pushing OKC outside of their traditional processes in fixed blade development, the OH-O folder is proof that OKC has a lot more to give and will continue to push its own boundaries.

OLD HICKORY[®] OUTDOOR MACHETE

The new compact Old Hickory Machete retains the classic look of the Old Hickory line with an American walnut handle and traditional brass cutlery rivets. The handle incorporates a “bird’s beak” butt which anchors the handle and allows the machete to rotate around the pinky for effective cutting with just a flick of the wrist. The blade is 9” long and 0.095” thick which makes it light and fast in the hand and 2 1/2” wide close to the tip which shifts the blade’s “sweet spot” forward increasing the cutting power of the blade where it is most needed. The blade material is the extremely tough 1075 carbon steel with a phosphate coating which will take and hold a fine edge. The overall length of the machete is 15 9/16” and it comes with a leather sheath. So whether you are preparing a camp site, sharpening tent pegs, splitting kindling or clearing the sight lines for your blind this lightweight machete is the perfect tool for the job.

Ti22
EQUIPMENT

Ti 22 EQUINOX

Deciding to continue the Ti 22 folder line meant stepping up the options available and not adding more of the same things. While the handle, blade, mechanics and deployment styles all stayed the same, the real advancement in choice came in steel type. Offering

S35VN premium steel on the Equinox is another step forward for Ontario Knife Company to show that it's listening to its consumer bases.

The Equinox has a color palette fitting of its name creating a balance of light and dark. Everything down to the hardware & clip match the blade color which contrasts perfectly with the brass colored, titanium, frame lock handle, which really becomes the focus point for the knife.

OKC wants to display a feeling of balanced design and material

choice with this piece. The previous Ti 22 release, the Ultrablue, was a great extension into form, function and affordability with similar materials seen from OKC in the past. With the update in steel for this piece, the Equinox feels more regal with added value, though the shapes have stayed the same. With its updated sleek color tones paired with the premium steel the Equinox marks another instance where Ontario Knife Company is continuing to bring high quality designs and materials to the market.

OLD HICKORY® SERIES

First introduced in 1924, the Old Hickory® knives are the most venerable product line still in active production. The Old Hickory® knives feature a hardwood handle secured with brass compression rivets to high carbon steel blades that are both very sharp and capable of retaining an edge better than most stainless knives. Proudly manufactured with artisan processes for over 90 years, Old Hickory® has stood the test of time and is proven to be the best carbon steel kitchen cutlery sold today.

▶ AGILITE® SERIES

The Agilite® line was designed to be the most lightweight, durable, ergonomic, and advanced cutlery produced by Ontario Knife Company. Engineered down to the edge geometries by blade-master Dan Maragni, the Agilite® knives are technically superior to almost any cutlery in the market. Featuring double injection heat resistant molded handles and Sandvik 14C28N™ fine carbide steel, the Agilite® knives define premium cutlery. However, true to form for OKC® products, they are affordably priced.
