**BEST MAINS CABLE**

CLEARER AUDIO COPPER-LINE **£95 (1m)**

Many people still don't believe that mains cables make a difference. We're sure that if they heard a Copper-Line in their system, that view would change. Try one, and you'll hear a dramatic improvement in refinement, detail and dynamics, while the sense of scale will grow. Plug one into your TV, and you'll notice richer colours, less picture-noise and sharper definition. Almost a ton on a mains lead may seem like a lot of money, but see and hear the difference it can make, and you'll be amazed. Yes, really.
