Rodents Odor Free International, Inc.
200 – 535 Yates St.
Victoria, B.C. V8W 2Z6
Tel.: 888-481-2976

DIRECTIONS FOR USE:

Rodents Away Odor Free reduces house mouse (*Mus musculus*) presence and activity. House mice tend to travel along walls; therefore, sachets are best located on the floor along walls, in confined places, by gnawed openings, and on either side of doorways to rooms.

Clean areas where house mouse activity is observed. Remove individual cloth bags (sachets) from the plastic resealable pouch and place at approximately 3 m (10 ft) intervals throughout the areas where there is house mouse activity. If house mouse activity is present in a confined place, such as in a cupboard, position one sachet within each space (one per 114 L volume).

Check every two weeks for evidence of house mouse activity or other indications of presence. Replace sachets as necessary, or if house mice return. Provide an exit/opening during early stages (24-48 hrs) of treatment to allow house mice the opportunity to vacate. If small holes are observed in the structure, plug or repair these openings once house mouse activity has ceased to prevent further house mouse infiltration.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

Wash thoroughly with soap and water after handling.

FIRST AID

If swallowed	Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.
If on skin or clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If in eyes Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION

Treat symptomatically.

STORAGE

Store this product away from food or feed.
