THE PATH TO GREAT DESIGN

MEON
DELIVERING GREAT SURFACES

THE PATH TO GREAT DESIGN

The journey of a thousand miles begins with a single step....

Your own imagination can help deliver and inspire every step of the way; handing the surface to you as a fresh canvas for your designs to become a wonderful reality, is what DekorGrip is all about...so go create.

A Wealth of knowledge and experience means the DekorGrip team can work very closely with designers and surfacing contractors, providing all the support and confidence needed.

This means bespoke expectations are achieved in supplying seamless and stunning stone carpets inside and out.

Power to lift and harmonise, or blend with any environment is of ultimate significance. Turning motivational and stimulating ideas into surfacing designs has a superb impact on the user.

The first impression is memorable and lasting, welcoming all along...THE PATH TO GREAT DESIGN.

OUR SOLUTIONS

"THE SURFACE I'VE ALWAYS WANTED"

RESIN BOUND SURFACING

An encapsulated natural aggregate surface with a smooth troweled finish. Perfectly meets current demands for sustainable drainage (SUDS) whilst ensuring a stunning surface.

"ENHANCE THE NATURAL BEAUTY OF YOUR LANDSCAPE"

RESIN BONDED SURFACING

An extremely hard wearing bonded aggregate surface. Offers a natural pleasing appearance of loose aggregate without any of the setbacks that come with loose stone surfaces.

TREE PIT SYSTEM

A resin bound system with typical make up of 10mm aggregate, to create voids to allow and promote the free flow of air and water around tree beds.

"PERFECTLY ENHANCES ANY PUBLIC AREA"

RUBBER MULCH SURFACING

A unique bound-in solution that gives a beautiful natural bark appearance. The environmental benefits of 100% recycled rubber bark make it far superior than organic mulches in every area.

"VERY SAFE WITH WONDERFUL AESTHETICS"

RUBBER CRUMB SURFACING

A bound-in rubber crumb surface used for play areas or to give an alternative decorative finish. Available in various colours for individual designs, conforms to fall height requirement BS EN 1177:2008.

BEAUTY AND DURABILITY ON YOUR DOORSTEP

DEKORGRIP RESIN BOUND SURFACING

Resin bound aggregate paving solutions offering natural and recycled materials, unlimited colours and designs that no other type of paving can match. Unlike many traditional paving systems, DekorGrip Resin Bound is permeable - demonstrating a sustainable approach to water conservation.

RESIN BOUND AGGREGATE SURFACING

For a Smooth Finish

FEATURES AND BENEFITS

- **Durable**

Hardwearing and long lasting for pedestrian and vehicular use.

- **Smooth Seamless Finish**

Smooth finish with no loose stone - Ideal for children, pushchairs, bicycles and disabled access.

- **Colour Stable**

Long lasting colour retention.

Suitable for
vehicles and
pedestrians

- **Selection**

Vast range of colour options giving endless design capability.

- **Easy Maintenance**

No loose stones or weeds. Simply brush, blow or power wash.

- **Quick and Easy To Install**

Rapid application, can be laid over many existing surfaces.

FULLY PERMEABLE

DekorGrip Resin Bound has been developed as a fully permeable SUDS compliant system that prevents standing water. This allows the water to soak through the surface avoiding potential flooding.

ECOGRID SUB BASE SYSTEM

EcoGrid is an interlocking grid system, ideal for use when installing DekorGrip Resin Bound surfacing. In the past, resin bound surfaces over a variety of sub-bases, such as porous asphalt or tarmac, which can be very time consuming and costly to install. EcoGrid removes this inconvenience and offers a quick, easy to install, cost effective and eco-friendly sub base layer.

TRIMS AND INLAYS

If you are looking for advice on our edging profiles, installation guidelines, or simply need some inspiration as to how our edging profiles can benefit your DekorGrip Resin Bound surface - contact us today.

RUBBER AGGREGATE SYSTEM

The flexible nature of a rubber and aggregate blend means it is highly resistant to sub-surface movement, giving an extremely low maintenance and slip resistant surface that can be installed straight onto compacted gravel or similar.

RESIN BONDED AGGREGATE SURFACING

For a Textured Finish

FEATURES AND BENEFITS

- **Durable**
Hardwearing and long lasting for pedestrian and vehicular areas.
- **Anti-slip**
Offers excellent anti-slip properties.
- **Clean Application**
No muck away costs on existing surfaces.
- **Colour Range**
Vast range of colour options, giving endless design capability.

- **Enhances**
Maintains and enhances surrounding environments.
- **Low Maintenance**
Occasional cleaning, with little or no maintenance.
- **Rapid Installation**
Quick, easy and cost effective to install.
- **Textured Finish**
A textured natural finish with anti-slip properties and no loose stone.

COLOUR AND DESIGN CAPABILITIES

In a range of colours, textures and aggregates, we can exactly match aesthetic demands as well as anti-skid, colour and function specifications. Logos, designs, motifs, lettering and more can all be incorporated to create innovative and stunning surfaces.

DEKORGRIP TREE PIT SYSTEM

DekorGrip Tree Pit system is a well proven, hard wearing and attractive porous tree surround. Loose stones and mulch are a nuisance in pedestrian environments, and tarmacadam or conventional paving has the effect of an impervious cap over the tree pit. DekorGrip Tree Pit systems prevent the material around the tree migrating. The nature of the system results in a highly porous tree-friendly surface immediately adjacent to the tree.

Can be retro-fitted around existing trees reducing trip hazards

SPECIALIST TREE PIT SYSTEMS

For a Sustainable Finish

FEATURES AND BENEFITS

- **Low Maintenance**

No loose stone; does not blow or scatter around.

- **Environmental**

Allows free flow of air and water to the root zone.
Reduces trapped litter.

- **Cost Effective**

Less expensive and easier to maintain than grilles. Only needs occasional cleaning.

- **Time Saving**

Highly effective weed control, eliminates the need for strimming and spraying.

- **Hard Wearing**

Will support light vehicular traffic.

Tree pit systems are a great solution for the environment and safety. Tree pits prevent migration of material around the tree meaning reduced mess and less maintenance. With an increased free flow of air and water, tree pit systems promote tree growth and encourage roots to grow down, eliminating trip hazards and pavement destruction.

DEKORGRIP RUBBER MULCH SYSTEM

Manufactured from 100% premium recycled tyres, DekorGrip Rubber Mulch offers a soft bound finish with the appearance of natural bark mulch. Apply with DekorGrip rubber binder to create a unique, maintenance free surface – a superb alternative to organic mulches. DekorGrip Rubber Mulch has been applied in many locations such as schools, play areas, gardens, picnic areas and more. Varied range of colour options available depending on your individual requirement.

BOUND AND BONDED EXPLAINED

BOUND - For a Smooth Finish

Professionally installed surface which is smooth, permeable and resistant to flooding.

Resin and stone are blended together in a forced action pan mixer, then troweled onto the surface to provide an extremely strong and attractive finish. Perfectly blends into any adjacent surroundings.

This is the premium resin aggregate surfacing system.

Base
build up
information
available

BONDED - For a Textured Finish

Offers the attractiveness and contemporary feel of a loose stone finish, but with none of the drawbacks. Resin is spread onto a tarmac or concrete sub base, then loose aggregate of up to 6mm in size is broadcast over the top.

Offers excellent anti-slip properties in all weathers, whilst remaining very aesthetically pleasing.

DEKORGRIP AND THE ENVIRONMENT

Low Carbon Footprint

Cold applied low energy laying methods. Can eliminate the need to remove existing surface, thus avoiding muck away transport. Typically thin layer means minimum raw material consumption.

High Recycling Elements

Recycled and renewable sources are the make-up of all DekorGrip surfacing. Once the system has reached the end of its useful life the material can be recycled as an inert aggregate.

Long Life of Finished Build

Laboratory and live testing extending back over 15 years gives the DekorGrip systems guaranteed longevity. Maintenance manuals and cleaning products are available in order to keep your surface in tip top condition.

Ease of Reinstatement

Systems can be matched and reinstated easily with identical formulation.

Safe to Install

No hot works or odours combined with quick curing times means that obstructions and disruptions are kept to an absolute minimum.

THE PATH TO GREAT DESIGN

TURNING VISION INTO REALITY

Every project that specifies a resin surface starts with a vision. Our unique and custom blends of natural aggregates will bring the vision of any architect, specifier or home owner to life.

DekorGrip will make your vision take form and become functional.
