

ORACLE SHOPPING CENTRE

DEKORGRIP RESIN BOUND

THE NEED:

The external areas of the Oracle Shopping Centre, Reading had become unsafe due to the slabs being uneven. This meant that the surface needed to be replaced and the overall look of the surface greatly improved aesthetically.

The surface would also have to be sturdy due to it being in a major area of foot traffic for the shopping centre.

SOLUTION:

A complete overhaul of the entire surface was required removing all existing uneven paving slabs. This ensured that all surfaces would remain smooth, removing all trips hazards and allow water does not sit on the surface.

Porous tarmacadam was installed prior to the DekorGrip Resin Bound system, with UV protection. Selected in Pearl Grey which was a custom blend for this installation at 18mm depth.

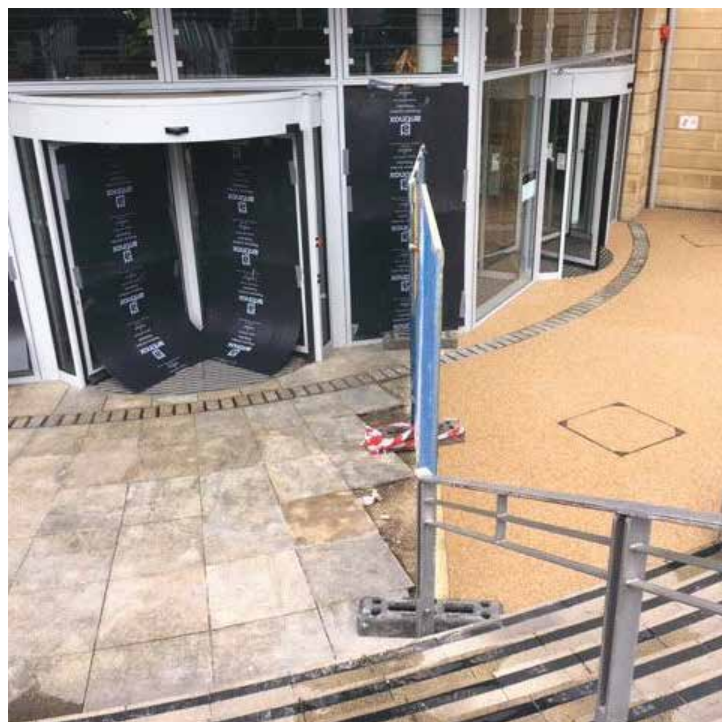

SUMMARY:

The installation contributed to reducing health and safety risks, a very important aspect of public open spaces, showing their actions in answering their responsibilities.

The use of DekorGrip Resin Bound (UV) system also means that the surface will last for years without the fear of fading through sun damage.

SYSTEMS USED:

- DekorGrip Resin Bound (UV)
- Pearl Grey
