

# CONTEC ELEPHANT®

## SHOTBLASTER

The Contec Elephant® is ideal for dust free preparation of areas, especially with restricted access. This shotblaster is safe and simple to operate with lightweight and compact dimensions. It is ideal for smaller contracts which normally cannot be blasted economically. The design makes it possible to blast almost up to the wall which minimises handwork and edging - especially in the corners.

### FEATURES & BENEFITS

- Retexture smooth surfaces - cost effective solution to increase slip-resistance
- Light weight - easy transportation (even in a small commercial van)
- Ideal for commercial sites e.g. warehouses, distribution centres, & transport hubs
- Low overall height for work under racking, scaffolding, and benches
- Dustless operation with a standard industrial vacuum
- Standard 3 pin 230V supply required

DELIVERING GREAT SURFACES

## TECHNICAL:

Working Width:	200mm
Weight:	89kg
Motor:	2kW / 12A / 230V / 50Hz
Motor Rotation Speed:	2640rpm
Height:	900mm
Length:	1150mm
Width:	400mm
Hose Diameter:	70mm

## USES:

The Contect Elephant® is typically used to prepare concrete floors removing dirt and grim from the concrete giving a texture surface ideal for applying paint systems.

The system is also used for improving surface texture, for improved slip resistance. Over time, smooth surfaces build up dirt and grim causing the slip resistance level to drop significantly, especially when wet. This machine leaves the surface clean and textured, ideal for exits and entrances.

- Factories and warehouses
- Internal car parks and garages
- Offices and commercial buildings

## RECOMMENDATION:

Recommended for use with Contec CDM 3000 230 V Mobile Dust Extraction Unit. Also, use Contec Magnetic Brush for removing stray metal shot from the floor once blasting is complete.

## TRAINING:

Full training packages are available from Meon. This will ensure that proper usage of the machine is undertaken. Training is available on-site or at Meon.

## SERVICE:

In order to ensure the Contec Dust Extractor is at maximum working capacity it is recommended that a service is booked at least once every 12 months. This may alter dependent on usage.
