

WORLD'S LARGEST DAIRY COMPANY

LINE MARKING

SITUATION:

The newly built factory found that the brand new walkways, lorry bays and numbering, painted just a few months prior were not performing and flaking, and chipping up, they needed a system that was going to last.

PROJECT GOALS

- Longevity of line marking
- Bright coloured and crisp lines
- Fast curing products

SOLUTION:

Having spent time with the site staff and providing expert advice, Meon was able to ensure that the line marking was functional, bright and long lasting.

Meon provided the necessary training and support to the team for the lining process. The areas to be marked were primed with UltraPrime before the lines were completed with Spectrum products in both yellow and white.

REQUIREMENTS:

The Meon team spent a great deal of time on location assessing what was best for the Dairy site, which products would provide the best results and supplied a fully spray-able MMA system which was fast to lay.

This system did not require any hot works; large machinery meaning costs could be kept down. This also meant that the system could be laid in a short amount of time minimizing impact to business.

SYSTEMS USED:

- Graco LineLazer
- UltraPrime
- Spectrum sprayable MMA line marking paint
