

PATCHMASTER H576

MAGMA CASE STUDY

SITUATION:

Large potholes often appear on the main roadways into busy car parks, especially where a lot of the traffic is HGV traffic. This situation required a simple but permanent solution that the maintenance team could carry out with minimal equipment .

SOLUTION:

Meon prides itself in providing quality products being either permeant or quick fix repair to roads. The PatchMaster H576 is the perfect candidate when it comes to late night callout and repairs:

- PatchMaster H576 is an all-weather pothole repair system to ensure a permanent or quick fix solution to roads and highways.
- Allows for the road to be open immediately after reinstatement
- BituSeal Primer and ThermaBand R171 overbanding was used

SUMMARY:

Along with Meon's help maintenance teams can ensure the highest quality in their road maintenance and repairs. Thanks to ongoing innovation and working closely with the local authorities to deliver great surfaces. Once again Meon supplied the right product to fix any reinstatement.
