

CYCLE LANE DELINEATORS

DIVIDING ISLAND

Meon's range of Cycle Lane Delineators offer increased protection for cyclists from other vehicles, creating a physical barrier between the road and cycleway. This Dividing Island is a modular system providing continuous low level division and is available in three different colour schemes. All the units have reflective white edges and the end units have a mini Siglite stud for 360° reflectivity, increasing visibility in dark conditions. The system comes as standard in 500mm x 500mm units, but it can be customised in length and shape to suit any requirements. All our delineator products are made from recycled vulcanised rubber which is an environmentally friendly solution and is both durable and weatherproof. They are also very quick and easy to install, remove or reconfigure as the units are simply bolted into the ground.

FEATURES AND BENEFITS

- Mini Siglite 360° reflective stud in end units
- Manufactured from recycled rubber
- Modular, customisable units
- Quick and easy installation
- Reflective white edges
- Range of colours

MEON
DELIVERING GREAT SURFACES

PREPARATION:

Ensure the surface is clean and clear of debris prior to installation.

APPLICATION:

Mark out position of the unit. Place the unit in position and mark out where the fixing holes are through the unit. Remove the unit and drill holes into the surface sufficient depth to fit the bolt plug. Place bolt plugs into the holes. Before installing the unit, make sure to put in the metal connecting rod to connect to the next unit. Place the unit back in position and install the bolts through the unit into the pre-drilled holes with plugs. If installing posts on top of the unit, refer to the Delineation Post application instructions on the TDS or application card.

TECHNICAL:

Height: 130mm
Weight: 24kg

AFTERCARE AND MAINTENANCE:

The Delineator Units are resistant to weather conditions and do not require maintenance.

STORAGE AND PACKAGING:

STORAGE CONDITIONS:

Storage area should be dry and protected from extremes of temperature - i.e. between 5°C & 20°C.

SIZES AVAILABLE:

Standard end and middle units are 500mm x 500mm x 130mm
Custom sizes and shapes can be supplied.

HEALTH AND SAFETY:

Familiarise yourself with the application instructions before using this product. If you need a copy please call our technical team on **023 9220 0606**.
