

CYCLE LANE DELINEATOR

SEPARATOR

Meon's range of Cycle Lane Delineators offer increased protection for cyclists from other vehicles, creating a physical barrier between the road and cycleway. The Separator provides a simple low level delineation and is available in black with 3M reflective strips along either side for increased visibility especially in dark conditions. All our delineator products are made from recycled vulcanised rubber which is an environmentally friendly solution and is durable and weatherproof. The delineator products are also very quick and easy to install, remove or reconfigure as they are simply bolted into the ground.

FEATURES AND BENEFITS

- 3M reflective strips for increased visibility
- Manufactured from recycled rubber
- Simple yet effective delineation
- Quick and easy installation

MEON
DELIVERING GREAT SURFACES

PREPARATION:

Ensure the surface is clean and clear of debris prior to installation.

APPLICATION:

Mark out position of the unit. Place the unit in position and mark out where the fixing holes are through the unit. Remove the unit and drill holes into the surface sufficient depth to fit the bolt plug. Place bolt plugs into the holes. Place the unit back in position and install the bolts through the unit into the pre-drilled holes with plugs.

The Delineator Posts cannot be installed on top of these units but can be used alongside them to create a mixture of high and low level delineation.

TECHNICAL:

SIZES AVAILABLE:

700mm x 150mm x 45mm, 4.6kg

1200mm x 150mm x 45mm, 6.2kg

AFTERCARE AND MAINTENANCE:

The Delineator Units are resistant to weather conditions and do not require maintenance.

STORAGE AND PACKAGING:

STORAGE CONDITIONS:

Storage area should be dry and protected from extremes of temperature - i.e. between 5°C & 20°C.
