## SERVICE YARDS - CONCRETE SURFACES

### SCENARIO:

Service yards with well weathered concrete surfaces that have safety walkway routes running across them to provide safe walking routes for pedestrians.

### PROBLEM:

The problem is that existing materials such as paint and thermoplastic are not adhering and are wearing extremely quickly. This means that the safe routes are not clearly marked. A further challenge is that taking areas out of service for remarking causes operational challenges, and this needs to be kept to a minimum, so a longer service life is important.

### SOLUTION:

The solution is to use mechanical preparation equipment such as the GrindLazer range to remove existing markings, and prepare the surface back to raw concrete. It also leaves a shallow groove using the high production range with PCD head. This allows the new marking to be inlaid, which extends service life. Then a rapid drying primer is applied to seal and provide good levels of adhesion.

Lastly UltraLine L210 lining product is applied which has very quick curing along with excellent adhesion, and very high strength. This means that the marking gives excellent service life without requiring long access times during installation.

## PRODUCTS:

**UniPrime X250**  
Universal Primer

#### BENEFITS:

- Fully sprayable
- Excellent adhesion
- Ideal for line application

**SIZE:** 5 L and 25 L tins

**UltraLine L210**  
MMA Linemarking Paint

#### BENEFITS:

- Very hard wearing
- Excellent adhesion
- Very fast cure time

**SIZE:** 8kg tins

**GrindLazer DC87 G**  
Standard Series Scarifier

#### BENEFITS:

- Dual depth control
- Comfort grip handles
- Dust extraction outlet

**CUTTER HEAD:** Miller

**GrindLazer 1013 DCS**  
High Production Scarifier

#### BENEFITS:

- InstaCut technology
- TriBelt drive system
- Compatible with LineDriver

**CUTTER HEAD:** PCD Head

## CAR PARKS

### SCENARIO:

Retail store car parks and supermarket car parks are very busy environments. It is important to maintain the the parking bays and directional markings to a high standard to ensure the safety of pedestrians while maintaining a good shopping experience.

### PROBLEM:

Traditional methods such as the use of hot works are not only unfriendly to the environment, they also bring operational safety risks with the use of hot works in the vicinity of pedestrians. A further challenge is that the thickness of such systems creates a large build up of material, leading to trip and slip hazards being created.

### SOLUTION:

The solution is to use airless spray systems to cold-apply highway-grade marking paints. This is a more environmentally friendly solution with a much lower carbon footprint. Operationally the product offers very good service life, lifetime cost and is rapid drying for quick return to service. The use of the class leading battery powered machines is almost completely silent in operation. This means minimum downtime and disruption to stores and minimum loss of footfall as a result. The finished lines are brighter and provide an improved retail experience for the shoppers

## PRODUCTS:

**UniPrime X250**  
Universal Primer

#### BENEFITS:

- Fully sprayable
- Excellent adhesion
- Ideal for line application

**SIZE:** 5 L and 25 L tins

**MultiGrip F240**  
Slip-resistant Surface Coating

#### BENEFITS:

- Good SRV
- Fast cure time
- Fully sprayable and roller applied

**SIZE:** 20kg bucket

**ViaLine F210**  
Solvent Based Acrylic Linemarking Paint

#### BENEFITS:

- Fast drying
- Toluene-free
- Excellent opacity

**SIZE:** 20kg bucket

**LineLazer ES Range**  
Electric Airless Line Striper

#### BENEFITS:

- Long lasting single or double battery
- No engine noise, exhaust fumes or vibration

**SIZE:** 1000 OR 2000

## SAFE WALKING ROUTES

### SCENARIO:

A busy distribution centre needing important safe walking routes refreshed, but with a very short working window.

### PROBLEM:

The problem is that due to distribution centres being 24/7 in operations, taking any operational areas out of service causes disruption and operational challenges. This will impact on the customer experience negatively. Traditional systems either take a long time to fully dry, or have a very short service life.

### SOLUTION:

The solution is to use our UniPrime X250 quick drying primer and then lay out ViaLine F210 acrylic line marking system. This is extremely quick to apply using line marking equipment, and can be reopened to traffic within a few minutes, without impacting negatively on the lifetime of the marking. The use of class leading battery powered spray equipment increases the safety of the whole operation as it is silent in operation, and the technician is much more aware of what is happening around him. This leads to greater Health and Safety during the application process.

The finished result gives bright clearer waymarking and safe route markings, without impacting on operational efficiencies.

## PRODUCTS:

**UniPrime X250**  
Universal Primer

#### BENEFITS:

- Fully sprayable
- Excellent adhesion
- Ideal for line application

**SIZE:** 5 L and 25 L tins

**ViaLine F210**  
Solvent Based Acrylic Linemarking Paint

#### BENEFITS:

- Fast drying
- Toluene-free
- Excellent opacity

**SIZE:** 20kg bucket

**LineLazer ES Range**  
Electric Airless Line Striper

#### BENEFITS:

- Long lasting single or double battery
- No engine noise, exhaust fumes or vibration

**SIZE:** 1000 OR 2000

# VIRTUAL | EXPO

## VIRTUAL EXPO | LINE MARKING & SURFACE REPAIR

Welcome to the Virtual EXPO. A showcase of some of our exciting new-to-market innovations, enabling the industry to embrace new practices and technology as soon as possible.

### VIRTUAL EXPO | LINEMARKING APPLICATIONS

Line Marking application demonstrations. In these videos we cover a range of situations such as; electric parking bays through to Eco-friendly line marking.

### VIRTUAL EXPO | SURFACE REPAIR APPLICATIONS

Surface Repair application demonstrations. In these videos we cover a range of situations such as; Manhole reinstatement through to Sunken Trench repairs.

# TRAINING ACADEMY

The **MEON** Training Academy offers access to a wealth of information, sharing years of accumulated knowledge and skills to ensure your team is fully trained. Providing both theory and practical training, accredited to recognised standards.

Once registered, for free, onto the online Training Academy portal users instantly gain access to our series of free training videos “The Basics”. Further advance your training by selecting either our online ‘Lite@ courses or face-to-face ‘Pro’ courses.

Subjects cover use of the machines as well as important Health and Safety information, maintenance best practices, and handy tips!

‘The Basics’ series | ‘Lite’ series, online courses | ‘Pro’ series, F2F training
