INTERNAL WAREHOUSE LINES

SCENARIO:

Internal warehouse lines get a lot of wear and tear from constant tyre marks, spillages, and general day to day activities.

PROBLEM:

The problem is that if the lines have a matt or a semi-matt finish they will collect soiling and dirt within the texture, and aggressive cleaning methods can in fact damage the integrity of the lines.

SOLUTION:

The solution is to use our ClearSeal X260, a protective clear sealer. When applied over our ViaLine F210 solvent based acrylic linemarking paint, it provides a higher gloss finish, which will collect less soiling and is easier to keep clean. We also recommend applying UniPrime X250, part of our universal primer range, before laying/spraying Vialine F210 so it bonds to the surface more efficiently.

The use of ClearSeal X260 has the added benefit of protecting existing lines from edge damage and provides a longer life, as it provides an extra layer of protection.

PRODUCTS:

UniPrime X250
Universal Primer

BENEFITS:

- Fully sprayable or roller applied
- Excellent adhesion
- Ideal for line application

SIZE: 5 L and 25 L tins

ViaLine F210

Solvent Based Acrylic Linemarking Paint

BENEFITS:

- Fast drying
- Toluene-free
- Excellent opacity

SIZE: 20kg bucket

ClearSeal X260
Solvent Based Acrylic Varnish

BENEFITS:

- Resists soiling
- Leaves an easy clean surface
- Improves visibility, safety and productivity

SIZE: 12kg tins

LineLazer ES Range

Electric Airless Line Stripper

BENEFITS:

- Long lasting single or double battery
- No engine noise, exhaust fumes or vibration

SIZE: 1000 OR 2000

PROJECT MANAGEMENT TOOLS

SOLVENT-FREE LINE MARKING PRODUCTS

SCENARIO:

Solvent-based products causing possible cross contamination in food areas, or cause distress to workforce.

PROBLEM:

The problem is that in areas such as food storage and distribution warehouses some foods are susceptible to absorbing strong odors, such as those created by solvent based paints. Even in non-food areas there is a problem of lingering smell where solvent based products are used, and it can lead to complaints.

SOLUTION:

The solution is to use one of our water-based line marking product ranges. These do not contain any solvents and whilst no paints are completely odourless there is a much lower level of noticeable odour. This removes the risk of any contamination of food items.

Whilst there is a common misconception that water-based products are not as durable, extensive testing has proved that is this is not the case and in fact water-based can last as long or even longer as solvent-based equivalence.

Application methods are extremely versatile and compatible with the same methods as used to apply solvent based paints. There is the additional benefit of no solvent-based cleaners being required and and there are no COSHH issues created by the storage of water-based products as they are not hazardous.

PRODUCTS:

UniPrime W252
Water Based Concrete Primer

BENEFITS:

- Easy to apply
- Excellent for waterbased paint on concrete floors

SIZE: 5 L bottles

ClearSeal W260
Protectline Clear Sealer

BENEFITS:

- Very low odour
- Extends the life span of lines
- Full cure in 60 minutes

SIZE: 1 L container

VersaLine W210
Water Based Acrylic Linemarking Paint

BENEFITS:

- Non-hazardous product
- Non-flammable
- Fast drying

SIZE: 20kg drums

SureStripe W218
Sprayable Water Based Paint

BENEFITS:

- Fast and neat applications
- Range of colours available
- Solvent and lead free - low odour

SIZE: 6kg and 20kg tins

PROJECT MANAGEMENT TOOLS

COMPLETE FLOOR COVERING

SCENARIO:

Internal areas that need a complete floor covering which needs to be cleanable, but also have slip-resistant properties.

PROBLEM:

The problem is that areas such as workshop floors benefit from a floor coating, as it prevents any penetration of spillages into the slab, and enables higher levels of cleanliness to be maintained. The challenge is that if a smooth coating is applied the area can quickly become slippery in the case of spillages, or if water is collecting in areas such as loading bays where it can be brought in by vehicles. These can lead to a serious Slip Hazard.

SOLUTION:

The solution is to use a 2-pack product which has an anti slip particle mixed into it. This product cures to provide a very tough and durable finish, which has slip resistant properties due to the fine particles being encapsulated within the coating. The finish is still easy to clean and therefore meets the requirements. It is also durable to high levels of traffic and resists spillages of chemicals.

PRODUCTS:

FloorCote W440
Water Based 2PK Epoxy Floor Coating

BENEFITS:

- Water based epoxy system - low odour
- Use as full gloss or anti slip - reduce accidents
- Suitable for vehicles and fork lifts - hard wearing
- Approved for fire resistance and indoor air quality
- Adheres to concrete, steel and ceramic tiles
- Easy, simple application

SIZE: 5 litre kit

FloorCote W445
Rapid Cure Floor Coating

BENEFITS:

- Less Downtime - Fast curing for rapid return to traffic
- Water based epoxy system - low odour
- Increased slip resistance - reduce accidents
- Suitable for vehicles and fork lifts - hard wearing
- Approved for fire resistance and indoor air quality
- Easy to apply - adheres to concrete, steel & ceramic

SIZE: 4.5 litre tins

VIRTUAL | EXPO

VIRTUAL EXPO | LINE MARKING & SURFACE REPAIR

Welcome to the Virtual EXPO. A showcase of some of our exciting new-to-market innovations, enabling the industry to embrace new practices and technology as soon as possible.

VIRTUAL EXPO | LINEMARKING APPLICATIONS

Line Marking application demonstrations. In these videos we cover a range of situations such as; electric parking bays through to Eco-friendly line marking.

VIRTUAL EXPO | SURFACE REPAIR APPLICATIONS

Surface Repair application demonstrations. In these videos we cover a range of situations such as; Manhole reinstatement through to Sunken Trench repairs.

TRAINING ACADEMY

The **MEON** Training Academy offers access to a wealth of information, sharing years of accumulated knowledge and skills to ensure your team is fully trained. Providing both theory and practical training, accredited to recognised standards.

Once registered, for free, onto the online Training Academy portal users instantly gain access to our series of free training videos “The Basics”. Further advance your training by selecting either our online ‘Lite@ courses or face-to-face ‘Pro’ courses.

Subjects cover use of the machines as well as important Health and Safety information, maintenance best practices, and handy tips!

‘The Basics’ series | ‘Lite’ series, online courses | ‘Pro’ series, F2F training
