

Give your customers a darker, fuller and more dramatic lash and brow appearance with GladGirl Lash and Brow Tints. Lash and brow tinting is a procedure to semi-permanently dye the eyelashes and eyebrows by matching their existing color or giving them the color that they desire. Tinting their eyelashes will give your clients the look of wearing mascara without having to apply it daily. Brow tinting is very common today and is done in most salons as part of the process for dyeing hair on the head. The difference between what is used on the head for tinting and what is used on lashes and brows for tinting is that our oxidants and tints are specifically formulated for this type of use.

Many states have started to allow this service in salons and spas, but we suggest you check with your local state licensing board to see if this service is permitted in your state or province.

We recommend doing a consultation with your client before performing this treatment. This product contains ingredients which may cause skin irritation to certain individuals, and when used for eyelash and eyebrow tinting may cause injury to the eye or surrounding skin. A preliminary patch test according to the directions on this card should be made before use if you or your customer are unsure of their sensitivity. If your customer is allergic to any hair tints do not perform this treatment on them.

CAUTION: These instructions do not take the place of professional in-person training. We highly recommend taking a professional class such as the one GladGirl offers. These products are for external use only. Avoid contact with skin and eyes. Should the tint, oxidant or remover ever enter the eyes flush immediately with water. If irritation persists consult a physician. Keep out of reach of children. Use only as directed. Use only as directed in a well ventilated area. For Professional Use Only.
