Pro Tips: Confirm with your client that they are not allergic to hair perming products. Do a patch test if necessary. Make sure the eyelid is clean and dry for the silicone pad curler to adhere with the Lash Glue. Clean silicone pad curler and eyelid well with "witch hazel" before attempting to adhere the silicone curler to the eyelid. For smaller eyelids the silicone curler can be trimmed to the size of the closed eyelid for better adhesion onto eyelids. Make sure all of the product is removed before moving onto the next step. Clean the product off with a slightly damp cotton swab. In order to avoid lash breakage and frizz, we suggest waiting 3 weeks before perming again, so as not to damage the lashes. Use cling film with steps 6 & 8 while those solutions are on to speed up processing time. The product should be stored in a cool, dark place. It is advised that treatment is carried out in a well ventilated room. Do not over process. Always use a timer - do not guess. Use within 6 months of opening.

Ingredients: Perm Lotion: Water, Ethanolamine, Thioglycolic Acid, 1-Hexadecanol, Polyquaternium-28, Steartrimonium Chloride, Glycerin, C12-15 Pareth-10, Urea, Glyceryl Monostearate | Setting Lotion: Water Hydrogen Peroxide, Cetearyl Alcohol, Propylene Glycol, Cetareth-20, Spearmint Oil, 1-Hydroxyethylidene-1, Sulfuric Acid, Disodium Phosphate Dodecahydrate, Sunflower See Oil, Sodium Stannate | Lash Glue: Water, Butyl Acrylate, Propylene Glycol, Dextrin | Keratin Lotion: Water, Glycerin, 1,3-Butylene Glycol, Propan-1,3-Diol, Sunflower oil, Carbomer, Sodium Hyaluronate, Dextran, Chamomile Oil, Keratin

LASHLIFT INSTRUCTIONS

1. Clean the eyelashes with GladGirl Wash & Wink or your favorite oil-free makeup cleanser. Apply cleanser with included white-tip, flocking brush or flat cotton pads. Rinse with water and pat dry.
2. Place the eye gel patches under the eyes, covering the lower lashes.
3. Apply #1 Lash Glue on the back of the silicone pad curler.
4. Adhere the silicone pad curler onto the upper eyelid.
5. Apply the Lash Glue on the top of the silicone pad curler to fix the upper eyelashes to the curler with the Y Brush lifting comb pushing the lashes gently up and onto the curler until they are fixed firmly in place.
6. Apply #2 Perm Lotion on eyelashes with a flocking or micro brush. Leave lotion on eyelashes for the following time: **thin lashes 5-7 minutes, semi-thick lashes 7-9 minutes, thick/coarse lashes 9-11 minutes.** To speed up processing time you may cover brows with cling wrap. (See Pro Tip on front of instruction card for more details.)
7. Totally remove all Perm Lotion from the eyelashes using a cotton swab.
8. Apply #3 Setting Lotion on eyelashes with a flocking or micro brush. Leave lotion on eyelashes for the following time: **thin lashes 5-7 minutes, semi-thick lashes 7-9 minutes, thick/coarse lashes 9-11 minutes.**
9. Totally remove all Setting Lotion from the eyelashes using a cotton swab.
10. Detach silicone pad curler from the eyelid, gently rolling a wet cotton swab in back between the roller and the skin. Follow through with the cotton swab gently loosening the eyelashes from the curler.
11. Clean off remains of the Lash Glue on the skin with a dampened cotton swab.
12. Apply a light coat of #4 Keratin Boost to the eyelashes with a mascara wand. Brush the boost through the lashes. Leave the Boost on to dry naturally.

Important Note: These instructions are not intended to take the place of professional LashLift training.

After Care: Wait 48 hours before getting eyelashes wet. After 48 hours you may apply mascara or a lash serum daily to maintain shape, support healthy growth and extend the duration of the LashLift treatment. A mascara wand can be used to maintain the desired shape..
