

MicroPod Bluetooth

Product description

The new MicroPod Bluetooth with True Wireless Stereo technology is the first standalone speaker in the Podspeaker series, which has a built-in battery and plays for up to 10 hours.

This means that it is now easier than ever to take the music with you wherever you go. The MicroPod Bluetooth can be used on its own, providing a unique music experience, but if you choose to purchase another MicroPod Bluetooth, wireless stereo pairing is possible to achieve the complete stereo experience.

In design terms, it descends from the iconic MiniPod, but as its name suggests, the form factor is somewhat smaller. The discrete dimensions make it particularly suitable for standing on the desk or shelf and with the optional wall bracket it is also possible to hang it on the wall.

MicroPod Bluetooth comes with real aluminum spikes in black. The spikes are also available as accessories in the following colors: Aluminum Soft Gold, Aluminum Soft Silver and Aluminum Dark Metal.

Use the product with

- ✓ iPhones and iPads via Bluetooth
- ✓ Android smartphones and tablets via Bluetooth
- ✓ PC and MAC via Bluetooth or minijack cable

Features

- ✓ Bluetooth with TWS True Wireless Stereo
 - ✓ Powerful Class D digital amplifier built-in
 - ✓ AUX minijack stereo input
 - ✓ Wallbrackets (optional)
-
