

## MiniPod

### Product description

---

The MiniPod is one of the world's most recognized loudspeakers. Since its launch in the early 1990's, the MiniPod has set a benchmark for what can be achieved, when moving away from conventional square box designs.

MiniPod's unique appearance did not happen by accident. The contemporary design exemplifies the term 'form - follows-function', with each of the three integrated spheres reducing the unwanted influence the cabinet has on the acoustic performance normally associated with more traditional speakers.

When combined with the soft-dome tweeter and woven Kevlar bass driver, the result is a speaker that can be placed anywhere – and yet still reproduce the high-end sound the Podspeakers are known for.

The Minipod is perfect for a simple stereo setup, TV-set with e.g. wall brackets or surround sound system.

Performance this good, combined with the unique design, makes the MiniPod one of the world's finest design loudspeakers, and therefore a good investment for the generation of people interested in design and music.

Matt Black, Matt Red and Satin White are the colors that shape the Podspeakers. The cabinet is understated and cool with its matt finish – and the housing material has glass fibers added, which at the same time reduces the cabinet resonance and enhances the housing strength. Overall it gives the plastic cabinet an even better performance.

The Kevlar driver in dark grey color with concaved dust cap, adds perfectly to a modern look – and for a modern acoustic sound, the x-overs and Kevlar woofers have been re-designed in 2019. The result: An 'airy touch' with more clear, yet balanced vocals and controlled bass performance, but still with the acoustic signature that makes it a Podspeaker.

### HOOPS AND SPIKES – MIX & MATCH

With the unique 'Hoops and Spikes' you can mix and match your own style of speakers. Do you want to go for the Nordic soft furniture wooden look? Or maybe the raw and metallic look? Or why not just create your own summer/spring or autumn/winter set-up filling the seasons with your favorite music for both your eyes and ears? You have endless opportunities available to match your unique lifestyle.

The Hoops around the Kevlar driver are easily mounted magnet solution. The standard comes in black – but for you, who wants to put your own touch on the listening experience, they can be bought in following colors: Wooden Light Oak, Wooden Dark Oak, Aluminum Soft Gold, Aluminum Dark Metal, Aluminum Soft Silver.

Originally the Spikes are designed for improving the resonance functionality. No matter the volume, they stand ground for minimizing the vibration from your home décor in contrary to square box speakers. The Spikes are easily switched and comes in the following colors: Wooden Light Oak, Wooden Dark Oak, Aluminum Soft Gold, Aluminum Dark, and Aluminum Light.

The wall bracket has been specially designed to complement the aesthetics of the MiniPod while functioning as a fully adjustable mount for suspending the speakers on walls and ceilings.

### Use the product with

---

- ✓ HiFi stereo amplifiers
- ✓ AV-receivers and Home Theatre
- ✓ Custom Installation Amplifiers
- ✓ HiFi Systems
- ✓ Sonos Amp
- ✓ HEOS Amp
- ✓ Bluesound Powernode

### Features

---

- ✓ 2 way hifi speaker
  - ✓ 5" woofer with Kevlar cone
  - ✓ Fiber glass enhanced housing
  - ✓ Spikes and Hoops (optional)
  - ✓ Wallbrackets (optional)
