

MiniPod Bluetooth

Product description

MiniPod Bluetooth - active speaker with wireless connectivity

The MiniPod is one of the world's most recognized loudspeakers. Since its launch in the early 1990's, the MiniPod has set a benchmark for what can be achieved, when moving away from conventional square box designs.

MiniPod's unique appearance did not happen by accident. The contemporary design exemplifies the term 'form-follows-function', with each of the three integrated spheres reducing the unwanted influence the cabinet has on the acoustic performance normally associated with more traditional speakers. When combined with the soft-dome tweeter and woven Kevlar bass driver, the result is a speaker that can be placed anywhere – and yet still reproduce the high-end sound the Podspeakers are known for.

The MiniPod Bluetooth is a perfect match as a standalone Bluetooth speaker, and with implementing the latest Bluetooth technology you can now mix & match MiniPod Bluetooth in three ways to comply with your way if listening to music.

1. Use it as stand-alone high-end mono Bluetooth speaker
2. Add a Passive MiniPod to create a perfect stereo setup for TV or music.
3. Use 2 x MiniPod Bluetooth and create a full wireless stereo setup with the integrated True Wireless Stereo technology.

Matt Black, Matt Red and Satin White are the colors that shape the Podspeakers. The cabinet is understated and cool with its matt finish – and the housing material has glass fibers added, which at the same time reduces the cabinet resonance and enhances the housing strength. Overall it gives the speaker an even better performance.

The woofer with Kevlar cone in dark grey color with inverted dustcap, adds perfectly to a modern look – and for a modern acoustic sound, the crossovers and components have been re-designed from A-Z in 2019. The result: An 'airy touch' with more clear, yet balanced vocals and controlled bass performance, but still with the acoustic signature that makes it a Podspeaker.

HOOPS AND SPIKES – MIX & MATCH

With the unique 'Hoops and Spikes' you can mix and match your own style of speakers. Do you want to go for the Nordic soft furniture wooden look? Or maybe the raw and metallic look? Or why not just create your own summer/spring or autumn/winter set-up filling the seasons with your favorite music for both your eyes and ears? You have endless opportunities available to match your unique lifestyle.

The Hoops around the Kevlar driver are easily mounted magnet solution. The standard comes in black – but for you, who wants to put your own touch on the listening experience, they can be bought in following colors: Wooden Light Oak, Wooden Dark Oak, Aluminum Soft Gold, Aluminum Dark Metal, Aluminum Soft Silver.

Originally the Spikes are designed for improving the resonance functionality. No matter the volume, they stand ground for minimizing the vibration from your home décor in contrary to square box speakers. The Spikes are easily switched and comes in the following colors: Wooden Light Oak, Wooden Dark Oak, Aluminum Soft Gold, Aluminum Dark, Aluminum Light.

Use the product with

- ✓ iPhones and iPads via Bluetooth
- ✓ Android smartphones and tablets via Bluetooth
- ✓ PC and Mac via Bluetooth or cable
- ✓ TV - via optical cable

MiniPod Bluetooth

Features

- ✓ Bluetooth aptX with TWS True Wireless Stereo
- ✓ TWS - True Wireless Stereo
- ✓ Powerfull Class D amplifier built-in
- ✓ Remote control
- ✓ AUX minijack stereo input
- ✓ Optical input for TV and other digital sources
- ✓ Subwoofer output
- ✓ Spikes and Hoops (optional)
- ✓ Wallbrackets (optional)
