

Maine Cottage®

Standard Bed Assembly Instructions

Shutter Bed

Meriweather Bed

Island Bed

Mabel Bed

PARTS LIST

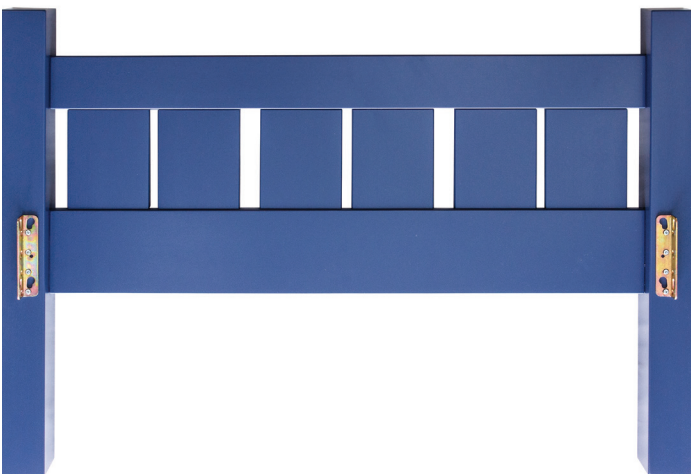

(1) Headboard

(6) Bed Slats

(1) Footboard

(2) Side Rails

(1) Center Support (not included in Twin & Double beds)

(4) Ball Finials with Dowels (Island and Mable Beds ONLY)

STEP ONE:
ASSEMBLE THE FRAME

Male portion of the Metal
Bed Bracket Hardware

Start by attaching your two siderails to the Headboard. The two male portions of the bracket are located on the Siderails. Align them with the female portion on the Headboard. Press down until it "clicks" into place.

Once the Side Rails are secured to the Headboard, then repeat on the Footboard.

STEP TWO:
INSTALL THE BED SLATS

For the Queen and King sized beds, lay the center support around the dowels. Twin and Double beds do not require a center support. All bed sizes will have the 6 horizontal bed slats. Lay all 6 Bed Slats on the Bed Slat Ledges located on the inside of the Sideboard so that they are evenly spaced. You should position one close to each end and one perfectly centered on the bed. Lay your bunkie board (sold separately) on top and the Bed Slats, then add your low profile mattress (sold separately).
