## M712 Nesting Box

### 49.5 LITRE EURO SIZE NESTING BOX

Nesting containers are versatile and robust and have a wide range of uses. They are manufactured from food-grade virgin polypropylene and are suitable for everything from general storage to use in the food production industry.

They can also be used in temperature-controlled environments. They are designed to nest easily to allow users to make the most of all available space; when nested, their total volume is reduced by up to 50%. This also makes them ideal for use as return trip packing. Flexible and long lasting, these useful containers help to keep any production or manufacturing area tidy and ordered.
