

DOING OUR BIT

We're on a mission to build a world our future generations will be proud of.

By the end of 2020 **ALL OUR PRODUCTS** and packaging will begin to be made from either **100% RECYCLED OR BIODEGRADABLE MATERIALS**

We began our mission by making our **swim**

shorts out of **recycled plastic bottles...**

We made all plastic bags that

protect our towels in transport to be made from a **biodegradable corn starch.**

We are committing to give **5% of our net profits to charitable causes** that we believe can make a big difference to our planet from March 2020.

We launched our **first ever**

100% recycled towel in

partnership with Whale and Dolphin Conservation who we will **donate 20%** of sales to.

Our second charity partnership towel will be released in **Summer 2020**. Working with One Tree Planted, every towel sold will fund the **planting of four trees.**
