

SIBARIS L

SIBARIST SPRESSO FILTER DIAMETER TEMPLATE

The SIBARIST ESPRESSO filters diameter do not corresponds to your portafilter diameter, the filter diameter corresponds to the inner bottom basket diameter. To know what is the filter diameter that will fit with your basket please size the inner bottom diameter of your basket using a vernier caliper, this size corresponds to the filter size that will fit with your basket.

If you don't have the option to measure the mentioned size you can print this template and find out which filter do you need by cutting the circles and place it inside your portafilter basket, the one which fits better in the basket (lower surface) corresponds to the filter diameter you need, the number in the middle is the filter diameter in millimetres. Print the document keeping the 1:1 scale (100%), if not the template size will not correspond to the size.

Please, double check that you don't have any measure instrument to size the basket before print this template.
