

LP 290V3

High-Output Everyday Pocket Light

Features

Constructed with aircraft-grade aluminum

LPE Optics

Patented TackGrip molded rubber grip

High quality pocket clip

Tactical on/off button

IPX4 waterproof rating

Batteries included (2 AA)

Operation Instructions

On/Off: Press and release the button on the tail cap to turn the light on and off.

Cycle Modes: First turn the light on by pressing down the button on the tail cap completely and releasing. Half-press to cycle through the modes (High/Low/Strobe). Turning the flashlight on and off quicky and repeatedly will also cycle the light through the three modes.

The light will automatically reset to High mode when off for longer than 2 seconds.

Battery Replacement

The LP290V3 uses 2 AA batteries. To replace the batteries, turn the tail cap counterclockwise to remove it. Tip the light downward to slide out both batteries. Insert two new batteries (+) side facing down. For best results, we recommend using brand new alkaline batteries that are the same voltage and brand. Re-attach the tail cap by pressing down lightly and turning it clockwise until tight.

If you know it will be a while between uses, we suggest removing the batteries from the flashlight and storing it in a dry, protected place.

Product Warranty

The LP290V3 has a Limited Lifetime Warranty Against Manufacturer's Defects from time of purchase.
