

## Features:

- Comfortable
- Convenient to use
- Easy to breathe
- Wear for up to several hours
- Adjustable – one size fits most
- Re-positionable
- Loop free and stringless
- Individually wrapped

## Stringless & Loop Free Masks Made Especially for Hair Professionals

Face coverings limit disease transmission and protect workers and customers. For hair stylists and barbers, traditional masks with ties behind the head, or loops behind the ears, are extremely difficult to work with. The new Self Adhesive Mask (SAM) has been designed to prevent interference when washing, cutting, coloring and styling – simplifying life for hair professionals.

Typical single-use salon masks cover the nose and mouth, but also restrict access to the back of the head or around the ears. Salon workers have reported customers having to constantly adjust slipping masks. SAM was developed to address these issues. Each mask has a self-adhesive edging that applies directly to the face: simply peel off the release liner and press on firmly. SAM provides total mouth and nose protection while ensuring total freedom to work everywhere on the head, including around the ears.

Made of soft three-layer non-woven filter material, these non-medical masks are made with a filtering efficiency of over 90%. Because they adhere to the face they won't slip off the nose, and hands will also stay under the cape instead of touching and adjusting the mask. SAM keeps the mouth and nose area free of stray hair and reduces eyeglass fogging too.

The skin safe, hypoallergenic and latex free adhesive is strong yet repositionable.

*"These masks make my life 1000% easier!"*

**Dan Dekker**  
Cordova Hair and Barbershop

*The SAM mask design is BRILLIANT!  
...SAM has you covered where it matters without interfering with the stylist's work!*

**Clare Wedgwood**  
Focus Hair Design

*My customers love them, it's very easy to work now without touching my customers' faces. Amazing for coloring or men's haircuts. Worth the money! Thank You!*
