

T110 Security Key

T110 is a USB-A type hardware security key for FIDO authentication. Certified with the new FIDO2 standard, the T110 provides the benefit of fast login and strong protection against phishing, account takeover as well as many other online attacks. Simply plug T110 into a USB port according to the login procedure then type in PIN and touch the sensor on the key to complete the login and access the account.

Supports true passwordless login to services such as Microsoft Azure Active Directory (Azure AD) joined Windows devices even in flight-mode. In addition, it is compatible with all the major web browsers where WebAuthn is implemented, and works seamlessly on online services like Azure AD, Google, Dropbox, Facebook, Twitter, GitHub and more.

It is fast, easy to use and affordable making it ideal for general public and enterprise deployment.

Powerful Security

T110 provides powerful security, fast and easy login with secure booting and secure storage features.

Competitive Pricing

T110 is affordable without compromising security. It is built on the same platform as G-Series keys¹.

Login with a Touch

T110 is easy to use with a capacitive touch sensor. Simply touch for U2F and input PIN for FIDO2.

Easy to Use Security Key

T110 does not require extra software nor driver. Insert the key into USB port and start using the key.

Supports Multiple Client Devices

T110 is a roaming authenticator to be used with multiple devices (no limit).

¹ World's First and Only FIDO2 Level 2 Certified Biometric (Fingerprint) Premium Security Key by TRUSTKEY. (Model No# : G310, G320). For more information, please visit www.trustkeysolutions.com.
