

THE RINGER®

GENERAL FEATURES

- Patent Pending
- Made in the USA
- Lifetime Warranty
- Fits most 10, 11, 15, 20, 30 and 40 lb. propane tanks
- Cushioned design safely protects hands and feet from sharp dangerous edges on the tank base
- Prevents rust rings and surface damage to decks, patios, floors and other surface areas
- Molded with a tough, durable specialized rubber material which is non marking, nonskid, non electrostatic and UV protected
- Lightweight, compact design fits most grill and heater cabinets
- Designed to be used with most portable propane tank applications. Propane grills, spare tanks, RV and camping, outdoor heaters, backyard gas firepits and tailgating are just a few of the possible uses

INTERNAL DESIGN FEATURES (see Attachment A)

- **Stepped rib design**
 - This unique and flexible configuration makes installation and removal easy while providing a secure fit to the tank base.
 - Easily fits on bent and rusted tank bases.
- **Air Flow Passages & Drain Holes**
 - Located between each of the internal ribs
 - Quickly removes water or moisture if the tank is stored or used in outside applications such as exterior mounted systems on RV's and travel trailers
 - Reduces tank base rusting

EXTERNAL DESIGN FEATURES (see Attachment A)

- **Extended Foot pads**
 - Prevents scratches and tank vibrations on RV and trailer mounted systems
 - Provides maximum stability on uneven patio and deck surfaces
- **Elevated Base Areas**
 - Air flows under the base preventing mold & mildew from forming on decks, patios, floors and other surfaces
 - Allows enough clearance under the tank to install fuel level monitoring devices
