Swift® Price Computing Retail Scales

ADAM®

With ABS plastic construction and stainless steel top pan, the easy-to-clean Swift scale provides an ideal weighing solution for retail operations. Featuring price-computing capability, the Swift can output data in different languages. Well-suited for deli or catering use, the Swift contains a highly visible backlit LCD to show weight, unit price and total. Customers can view and verify totals either on the rear side of the scale or, optionally, a pillar-mounted rear display. Specially designed drip channels beneath the pan help divert spills. For efficient customer service, Swift can store up to 161 of the most popular products and recall them with a few key strokes. An RS-232 interface or optional USB offer connection to computers and printers, allowing rapid data transmission. The Swift's rechargeable battery and auto power-off feature make this scale an excellent choice for market stands.
