

Time for smarter heating

Replace your old thermostat with the tado° Smart Thermostat and experience a new level of comfort and control whilst saving energy and reducing your heating costs.

Save on your heating bills every year

tado° is packed full of energy saving Skills and can save up to 31%* on your heating bills.

Your heating in your hand

Whether you're travelling home from a holiday or laying in bed, the tado° app allows you to control your heating from anywhere using your smartphone.

Insightful reports

Learn more about your home through in-app reports which display your temperature and humidity profiles, heating activity and energy savings.

Highly rated product

tado° is rated as Excellent on Trustpilot and has 4+ Star reviews across major review sites.

Personalise your heating in every room

tado° Smart Radiator Thermostats enable you to individually schedule and control your heating in every room, all from the tado° app. These can be purchased now or later and are easy to install yourself.

Control your heating with your voice

"Set the temperature to 22 degrees". tado° works with Apple Homekit, Google Home and Amazon Alexa, allowing you to control your heating with your voice.

Google is a trademark of Google LLC. Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates. Use of the Works with Apple HomeKit logo means that an electronic accessory has been designed to connect specifically to iPod touch, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

* Savings of up to 31% are based on a scientific study by the Fraunhofer Institute for Building Physics (IBP Report 527, Germany).

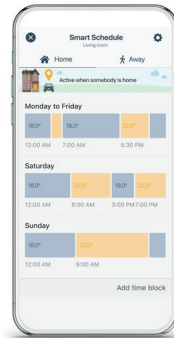

Controlling your heating with tado°

With tado° you can now control your heating in a number of ways either in the app, on the device or by using your voice with your smart assistant.

Smart Schedule

Personalise your heating schedule for different temperatures at different times of the day and even set individual settings for each time block if desired. Since the schedule is smart it only activates if someone's at home.

Manual Control

If you need to boost or turn down your heating for a fixed period of time, you can also manually control this through the tado° app or on the devices themselves.

What's so smart about the tado° Smart Thermostat?

tado° takes care of your comfort and savings through a variety of Skills. These key features transform your thermostat into your very own Climate Assistant.

Geofencing*

Based on the residents' locations, tado° can help you save energy by turning off the heating when the last person leaves and increase your comfort by pre-heating your home as you head back.

Weather Adaptation

tado° integrates up-to-date, localised weather information to assist in reducing your energy bill on warmer days whilst improving your comfort on colder days.

Open Window Detection*

tado° Smart Thermostats and Smart Radiator Thermostats can detect open windows and doors, and can temporarily turn off the heating to save you energy.

Air Comfort

By combining internal air freshness data with external air quality information, tado° provides specific, actionable advice to help you achieve healthier air in your home and reduce your risk of mould.

*Auto-Assist

Whenever tado° recognises the last person has left the house, or a window was opened, you will receive a notification to adjust your heating. With Auto-Assist this is automated, letting tado° take care of your heating. Auto-Assist can be purchased in-app for just £2.99 per month / £24.99 per year, can be cancelled at any time and is charged per home, not per user.
