

mydiamond.ca RING SIZE GUIDE

Below is a ring size guide that will help determine the adequate ring size for you regardless of certain conditions such as temperatures and weight gain or loss. If you have any questions, do not hesitate to contact us via email or through a contact form here and we will be happy to assist you.

Note: Your finger size can shrink or expand due to warm or harsh conditions during winter time. Even though the difference is small it can still cause difference when measuring your finger.

CONFIRM CORRECT MEASUREMENTS

IMPORTANT

In order to verify that this printed page has the correct measurements, measure the lines above to be 1 inch and 3 cm with a ruler.

RING SIZER USAGE STEPS AND DIRECTIVES

- Confirm the correct measurements (see above blue box) in order to have accurate measurements on the ring sizer.
- Ensure that the numbers on the sizer are visible enough.
- Only measure your finger at night because the weather has little effect during this period.
- Do not measure on cold or damp fingers because of the possibility of shrinkage; wait until it is warm and dry.
- The paper band should fit snugly for an accurate sizing.

We provide two Ring Sizer methods.

Method 1: MAKE YOUR RING SIZER

- Cut out the ring sizer provided by us.
- It works like a belt so pull the Multi-sizer tightly, but gently until you attain a comfortable fit.
- Read the size indicated by the arrow on the ring sizer. Quarter size result (6.5) is acceptable.

Method 2: MEASURE A RING

- Select a ring that perfectly fits the desired finger.
- Place the ring on the circular shapes provided below until you find one that both internal edges match.
- If the ring falls between two circles, order the quarter size provided in the middle of the chart.
