Why Pawtect® Pads?

Crate Liner/Under Bowls

Do you have customers who stay at the office a little longer and their sweet pup had an accident in their crate? Does their pup seem to get more water on the floor than in their mouth? Let our pads be the protection they need to keep homes clean and mess free.

House Training

Getting a new puppy can be stressful. Puppies also love to tear and destroy paper pads, which only adds to the mess and stress! Let our washable pads be there to blend in, protect your customers’ floors, and be washed to reuse over and over again.

Incontinence

Is your customer’s good ol’ boy having a tough time controlling his bladder or bowels? Save their furniture, floors, dog beds, and the pup’s guilty conscious with Pawtect® Pads that are perfect for any sized area or their dog’s favorite lounging spot.

Whelping

Is your customer’s sweet girl about to give birth or has recently had a litter? Pawtect® Pads come in many different sizes that are perfect for whelping any size dog! These pads lock in the fluids, protecting your customer’s home and keeping the new pups clean!

1. Triple-Stitched

The large, wide zig zag stitch accompanied by the sturdy, straight stitches make for one strong binding. This secure, triple-stitched binding ensures that you don't have to worry about whether or not your customers' puppy pads are going to successfully prevent a mess without falling apart.

2. WickQuick® Anti-Tracking

A proprietary fabric blend that quickly wicks, absorbs & holds in more liquid per square inch than other options in the market, locking the liquid in the pad so it can't be tracked all over your customers' home.

3. Waterproof, Leakproof & StickyPaw™ Backing

Pawtect® Pads are water proof, leakproof & our StickyPaw™ backing grips the floor, providing an anti-slip grip. So when your customer say, "Stay!", it actually does stay, no training needed.

4. Washable

Because our pee pads for dogs are washable & reusable, you are not only saving money, you are also making the impact on the environment a little less drastic. Disposable products add to landfill waste build up.
