

SoftSupps®

W H O L E S A L E C A T A L O G

THE SUPPLEMENT THAT WILL HAVE YOUR
PUP ASKING FOR MORE AND MORE.

petparentsbrand.com

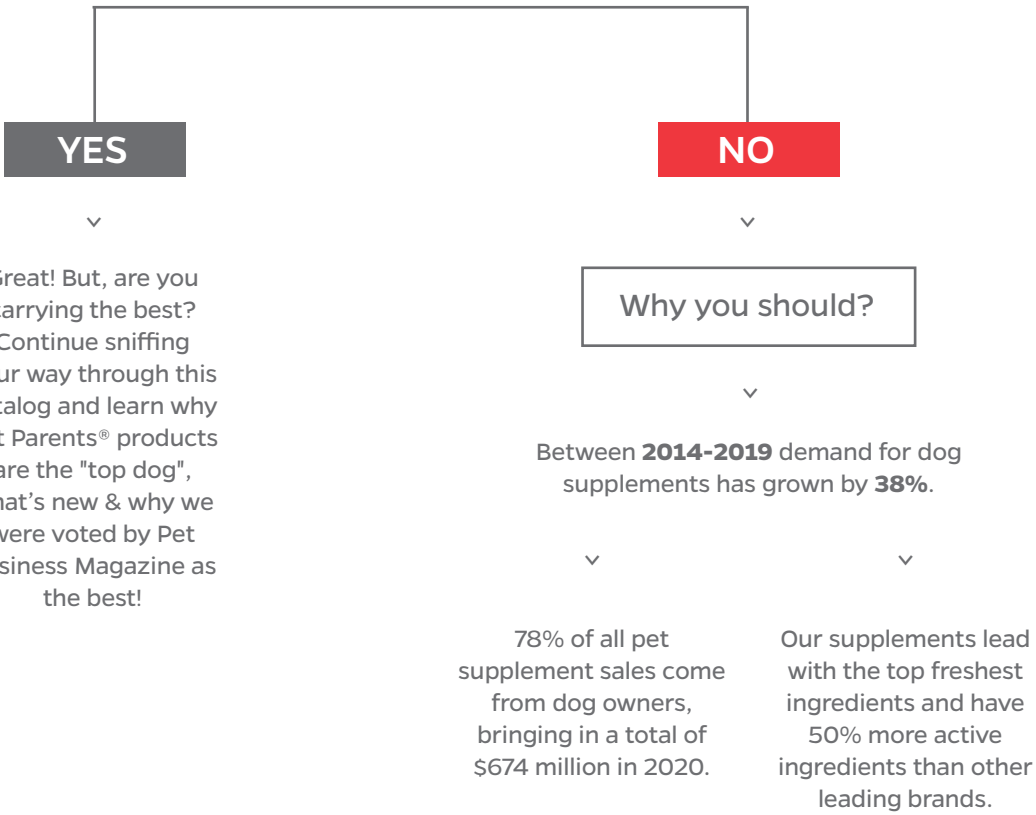

Pet Parents® **SoftSupps®** will have pups wanting to take their supplements like treats.

Every move we make in creating new products comes from our love for furbabies & our pet parent mindset. And, as we are pet parents ourselves, we know that every pet parent wants to be ensured that whatever they are putting in their furbaby's body, they may also be able to put in their own. Because of that, we meticulously created SoftSupps® with that focus.

No grain. No corn. No soy. SoftSupps® lead with whole meat and whole veggies, instead of low nutrition fillers like rice and oats (which is where others typically lead). We took a different approach in creating SoftSupps® formulas by ensuring that in addition to the key, premium active ingredients, our “other” inactive ingredients are also loaded with nutrition.

In addition to our supercharged branded ingredients proven to be more efficient, pure, and increase overall efficacy, SoftSupps® were formulated with more active ingredients to be able to attack issues from every angle, and all SoftSupps® are compatible with each other.

Do you currently carry **soft chew supplements**?

Why you should give 2 barks: It's simple. Your customers need them, so you sell them.

SoftSupps®

Safety First

Top Quality

Our SoftSupps® are created in the highest level, Safe Quality Food facility that is FDA inspected and GMP-approved.

Tested

Our SoftSupps® are tested for harmful bacterial pathogens, such as salmonella and E.Coli by a third party laboratory.

Fresh & Protected

It may seem like a small gesture, our SoftSupps® have a heat inducted seal liner that is air tight ensuring freshness.

Meticulously Formulated

- Carefully designed & crafted by leading pet supplement scientists
- Not private labeled
- Uses clinically-proven “branded ingredients”
- Entire supplement line is compatible with one another
- Preventative treat
- Results driven targeted solutions

What are SoftSupps®?

Eat Like a Treat

Why give your pup a supplement if they won't eat it? Our inactive ingredients were meticulously made to make your dog want to eat them, like a treat! Packed with nutrients like Wild Alaskan Salmon, Chicken, Pumpkin, Sweet Potatoes, Tomatoes, & Carrots.

Lead with Yummy Meats and Veggies

We lead with whole meats & veggies in all of our SoftSupps®, no fillers like rice & oats are used!

Active Ingredients

Pet Parents® SoftSupps® for dogs were specially crafted to have more active ingredients than other leading supplements. Active ingredients help assist with the immediate problem your pup is having!

Branded 'Super Ingredients'

Branded 'Super Ingredients' are clinically proven ingredients that go through a proprietary process. These ingredients increase efficacy & are more effective than commonly used basic forms of the ingredients.

We lead with whole meat and veggies

No grain. No corn. No soy. SoftSupps® lead with whole meat and whole veggies, instead of low nutrition fillers like rice and oats (which is where others typically lead). We took a different approach in creating our formulas for SoftSupps® by ensuring that in addition to the key, premium active ingredients, our “other” inactive ingredients are also loaded with nutrition.

Whole meat
(which depends on the flavor of the supplement)

Salmon

Chicken

Sweet Potatoes

Tomatoes

Carrots

We use clinically-proven “branded” ingredients.

SoftSupps® use branded ingredients; supercharged ingredients that undergo proprietary processes that increase their efficacy.

We use a unique, proprietary manufacturing process

When manufacturing SoftSupps®, our proprietary process is unique because we don’t add water or use heat (like other pet products, such as dental sticks, baked treats, and kibbles do). The process that is frequently used by other soft chew manufacturers includes the use of gumming agents, gelatin, and water, which results in high levels of these two food additives: humectants (to control moisture) and preservatives (to control mold). The use of these additives in pet supplements can be unattractive to pet parents.

SoftSupps®

Professionally Formulated.
Results-Driven.

Safety First

When creating Pet Parents® SoftSupps®, we put safety at the forefront and as a top priority. Ensuring the safety of your customers' pets is an absolute must, especially when it comes to something that they are putting in their bodies. So to do this, we make sure to take meticulous precautionary steps throughout the entire process.

SoftSupps® Are:

Created in a Level 3, the highest level, SQF-Certified (Safe Quality Food) facility that is FDA-inspected and GMP-approved (Good Manufacturing Practice is a system that ensures that products are consistently produced and controlled according to quality standards).

Tested for harmful bacterial pathogens, such as salmonella and E.coli by a third-party laboratory before they leave the facility and get anywhere near your store(s)!

Packaged with a heat inducted seal liner (HIS). Because of this, our caps provide an airtight and tamper evident seal. This is ideal for extending product shelf life, maintaining freshness, and providing ultimate protection.

Because these steps are strictly followed, your customers can rest assured knowing that their SoftSupps® are always safely handled from start to finish; how the chews themselves are manufactured, all the way to how they are being packaged, and everything in between!

No Grain. No Corn. No Soy.

Made in the U.S. with the
World's Finest Ingredients.

No artificial flavoring.
No artificial preservatives.
Made in the U.S. with the World's
Finest Ingredients.
