

Instructions For Use

- Kelosoft® should only be used on completely healed wounds
- At the earliest, Kelosoft® may be used 14 days after skin injuries or operations once wounds have clearly healed
- Massage the scar or stretch mark with a small amount, once daily, at night for 2-3 minutes
- Treatment could last for several weeks to months, depending on age and structure of the scar
- Do not use Kelosoft® on open wounds or mucous membranes; not for use on children under 13 years as well as during pregnancy and breastfeeding
