

Fenwick LT Mask Size Chart

Sizing Measurements: There are 3 important measurements when sizing a mask for your horse or pony. The distance between the eyes, the circumference toward the bottom of the cheek bone (depending upon your horse's conformation) and the length from behind the poll to the center of the face using the bottom of the cheekbones for a reference.

Mask Sizing	XSmall	Small	Medium	Large	Xlarge
Between Eyes	3"	3"	4.75"	5"	5.5"
Poll to bottom of mask	13"	14"	15"	16"	17"
Circumference at cheek bones	18"	20"	22"	24"	27"

Ear Height: S--4.5" M-L-XL--6"

*****Measurements are approximate as masks are hand made in USA. A tight, compression-type fit is not necessary for effectiveness.**

XSmall: ponies, weanlings

Small: yearlings, Morgan, Arabians

Medium: refined quarter horses, small thoroughbreds

Large: thoroughbreds, standardbreds

XLarge: larger heads, warmbloods

For more adjustability, the velcro closure is suggested.
