**DIFFICULTY** ●●●

## Instructions

**Step 1:** Depending on the size of your base, the cones are created from squares. The bottom rows of squares are 2.5 inches by 2.5 inches.

**Step 2:** Punch out 20-30 of that size square. Rotate square to look like a diamond, and wrap side point over and adhere to the other point, creating a cone.

**Step 3:** Pin each top of the cone to the base. Continue doing so in rows starting at the bottom of the tree, working your way up.

**Step 4:** Punch out 10-20 squares 2 by 2 inches. Repeat to make cones, and pin cones row by row.

**Step 5:** If needed, punch out 5-10 squares 1 by 1 inches. Repeat the steps above.

**Step 6:** For the top of the tree, cut several strips of paper 12 x 1/2 inches.

**Step 7:** Using a pencil, wrap the paper around the pencil, allowing the paper to curl up. Pin the curl-papers to top of the tree.
