DIFFICULTY ●○○

Approximate Time of Project: 20 minutes

MATERIALS

30x20cm printed cotton/polyester fabric
40x40cm plain cotton fabric
Thread (complementary to fabric)

EQUIPMENT

Fabric scissors
Sewing machine
Pins

HELPFUL HINTS

- Once on your face the mask should not be touched until removed. At which point you put it in a sealed plastic bag until you are able to wash and dry it. Because of this we recommend making a few so you always have one ready to go.
- This mask has three layers of fabric to make it. This will ensure it holds its shape and structure better and provides more protection.
- Print the mask template on A4 paper at "actual size".
- A 10cm piece of wire can be sewn into the edge of the mask where the bridge of the nose is to prevent glasses fogging up while wearing your mask.

STEPS

1. Use the CUT GUIDE and template provided to cut out fabric for one mask.

2. Cut four 3x40cm lengths from the plain fabric for the ties.

3. Pin the two printed fabric pieces right side together along the FRONT CURVE and sew the curve.

4. Place two pieces of plain fabric right sides together. Stack the remaining two pieces on either side so they sandwich the first two pieces. Pin and sew through all four layers along the FRONT CURVE.

1. Fold a tie in half so it is 1.5x40cm. Sew along the long raw edge and across one end. Turn right side out and repeat for the other three ties.

5. Pin the raw end of the ties to the right side of the printed fabric at the circles marked on the template. Baste so raw edges line up with the edge of the mask.

6. Open the fabric pieces and place right sides of plain and patterned pieces together.

7. Pin around edges making sure not to catch the fabric ties and sew leaving a 4cm gap at the bottom of the mask.

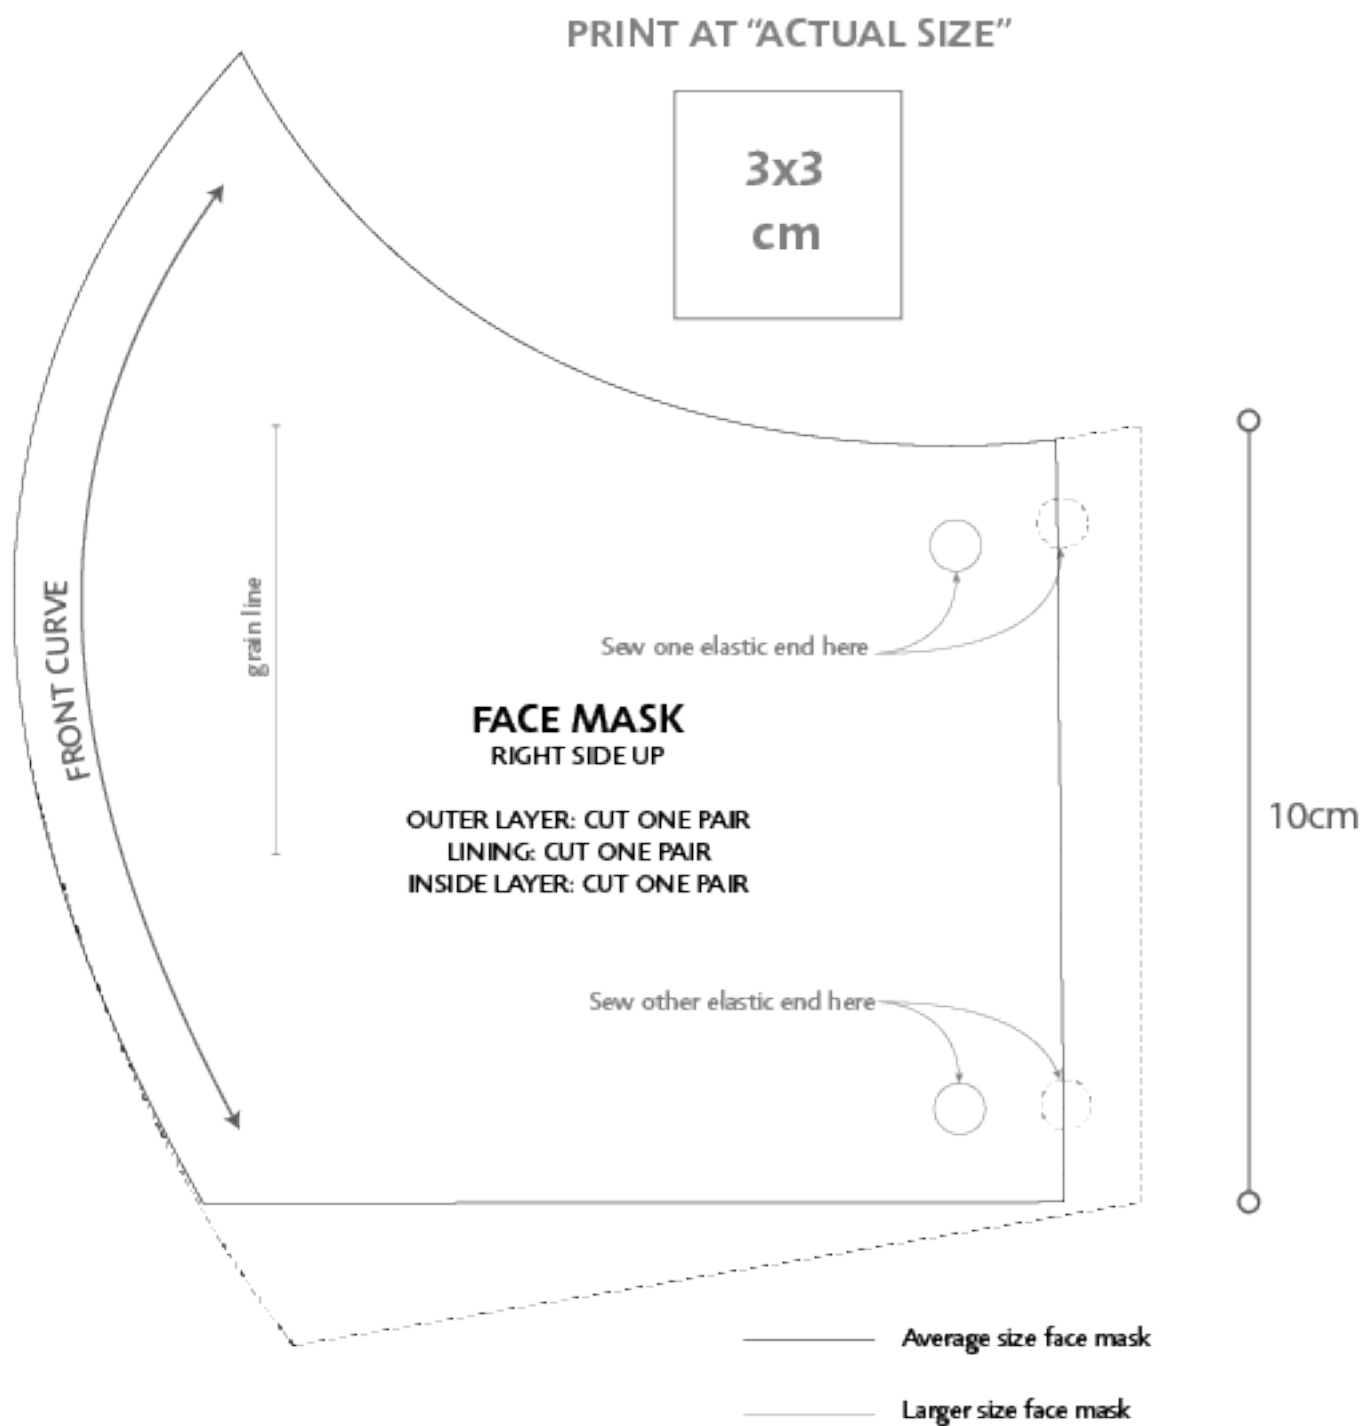

8. Turn right side out so print is on one side, plain is on the other and there are two fabric ties on each side of the mask.

9. Turn gap in on itself and topstitch around the edge of the mask to secure.

10. Wash mask with regular laundry soap or by hand with soap and allow to dry completely before wearing.

11. Wash your hands, with soap, or use disinfectant with at least 60% alcohol then pick up mask and place it over your mouth and nose tie behind your head to hold it in place.
