Mosaic Bauble

#A732

DIFFICULTY ●●○

Approximate Time of Project: 30 min (drying time not included)

MATERIALS

Shatterproof bauble
Mosaic tiles
Grout
Sealer

EQUIPMENT

Popsicle sticks
Rubber gloves
Safety glasses
Mixing container
Disposable sponge
Super glue

HELPFUL HINTS

- These baubles are heavy once done because of this many of them all together may not work on a tree. We suggest using them around your house as paperweights, gifts or in a bowl as decoration.

STEPS

1. Mix together your grout and sealer as directed on the packaging.
2. Unscrew the lid of the bauble so you have better grip.
3. Use the popsicle stick to put a small amount of grout on the back of a tile.
4. Stick the tile at the centre bottom of the bauble.
5. Repeat steps 3 and 4 evenly spacing the tiles roughly 3mm apart until the entire bauble is covered in tiles. Don't cover the thread the lid sits on.
6. Allow the tiles to dry for several hours until they don't move around when pushed.
7. Mix up more grout and use your gloved hand to wipe the grout over the tiled surface getting grout into all gaps.

8. Allow the grout to sit for 10minutes before using a slightly damp sponge to wipe off excess grout.

9. Allow the grout to dry completely.

10. Use your sponge to scrub any last bits of grout from the surface of the tiles.

11. Reattach the lid and glue it on. Allow to dry completely before displaying your bauble.
