STEPS

1. Cut all coloured squares in half diagonally to create twice as many right angle triangles. There will be an extra right angle triangle in the charcoal, navy, sky, candy, hot pink and purple fabrics which won't be used.

2. Sew the triangles to the squares:

- Place a coloured triangle and a white square right sides together.
- Line the right angle of the triangle up with the centre of the square. Pin and sew along the diagonal.
- Press the seam flat. You can trim the excess off the white triangle if preferred.
- Repeat the above steps for all coloured triangles and white squares.

3. Sew the strips:

- Place the 1a square and the 1b square right sides together. Pin and sew along the joining edge.

- Join the 1c square to the strip by placing it right side together with the 1b square. Pin and sew along the joining edge.

- Continue adding 1d, e, f, g and h squares until you have completed strip 1.
- Press the seams flat.
- Repeat for all following strips using the provided colour layout of the quilt.

4. Once all twelve of the strips have been sewn it is time to sew them together.

5. Place strip 11 and 12 right sides together so the coloured triangles of strip 12 align with the plain white side of

strip 11. Pin and sew along the joining edge and press the seam flat.

6. Join strip 10 to the facing by placing it right sides together with strip 11. Pin and sew along the joining edge and press the seam flat.

7. Repeat the above step with the remaining nine strips until all coloured tip squares are joined.

8. Take the 172x12cm white rectangle and place it right sides together with the long raw edge of strip 1. Pin, sew and press the seam flat.

9. Take the 252x12cm white rectangle and place it right sides together with the long raw edge of the h squares. Pin, sew and press the seam flat.

10. Lay the quilt out sandwiching the wadding between the backing fabric and the panel. Right sides of the backing and panel should be facing out.

11. Starting at the centre of the quilt and working outwards, place at least one curved safety pin through all layers of the quilt. Place approximately one safety pin per square. Cut off the excess backing fabric and wadding to 5cm from the edge of the front panel.

12. Quilt as desired then remove safety pins.

13. Trim the wadding and backing fabric to 1cm from the edge of the front panel.

14. Bind the edge of the quilt with the bias binding. Turn the binding over and invisible stitch the binding to the back of the quilt.
