Shibori Folding

EASY

DIFFICULTY ●●●

Approximate Time of Project: minutes

MATERIALS

Natural fabric
Wooden triangles
Dowel
Twine

EQUIPMENT

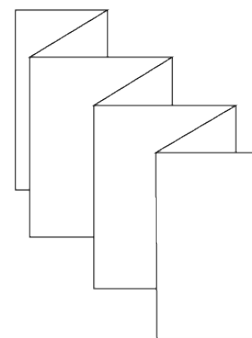

Scissors
Clamps
Pencil
Gloves
Bowl
Dye

DEFINITION- RESIST DYEING

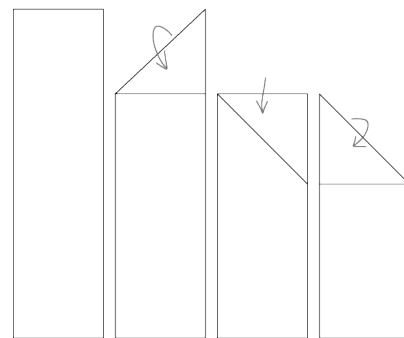

Resist dyeing is a traditional method of dyeing textiles with patterns. Methods are used to "resist" or prevent the dye from reaching all the cloth, thereby creating a pattern

STEPS

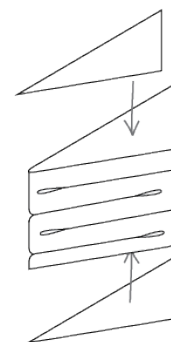

1. Cut the fabric to the desired size.
2. Soak the fabric in water and ring out until it doesn't drip.
3. Triangle resists;
 - a. Accordion fold the fabric to create a long rectangle.

- b. Accordion fold the fabric to create triangles.

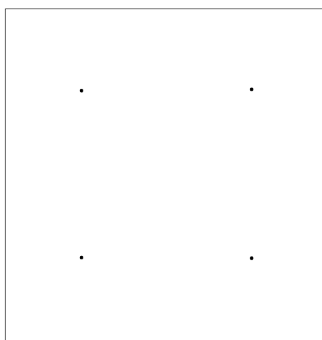

- c. Once all fabric is folded into triangles lay a wooden triangle on the top and bottom of the stack.

d. Clamp the wooden triangles together using at least two clamps. The clamps should be secure enough that the fabric will not move.

4. Twine wrapping;

a. Lay the fabric out on a table and mark the centre points of where you want your circles.

b. Pinch one of the points and lift the fabric up from the point.

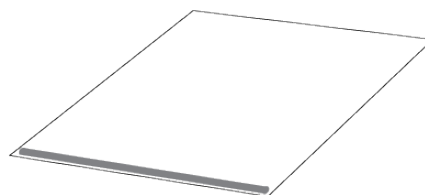

c. Wrap the twine around the fabric from the point down wrapping tightly.

d. Knot the twine 5cm from the point.

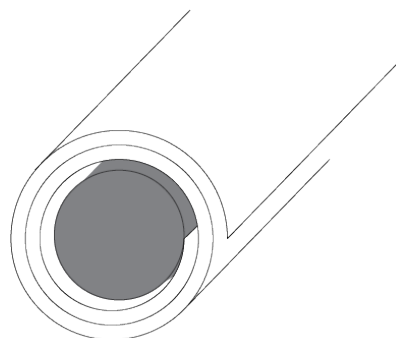

e. Repeat for the other points.

5. Dowel resist;

a. Lay the fabric out on a table and place the dowel at one edge.

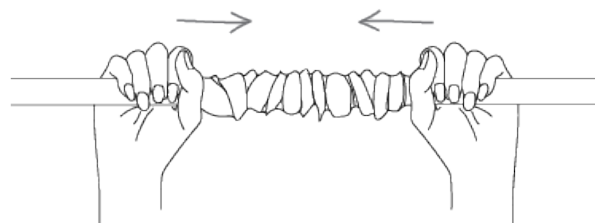

b. Roll the fabric around the dowel.

c. Wrap twine tightly around the fabric-covered-dowel.

d. Push the fabric from both sides of the dowel tightly into the middle so it bunches up.

e. Wrap more twine around the fabric to keep it bunched in place.

6. Dye as instructed on packaging.
