Monster Mask

HOW TO MAKE

Monster Mask

DIFFICULTY: Beginner

Approximate time of project: 30 mins

MATERIALS

Disposable face mask
White glitter foam sheet
Black cotton fabric
Pink felt
Arbee bead wire
Wire cutters
Festv feathers in green
Sullivans hot glue gun
Sullivans glue sticks
Scissors

STEPS

- Place black fabric over the top of your mask and trace an outline
- Following the outline, cut a rectangular piece of fabric to the size of your mask
- Cut long sharp triangles in the shape of teeth from the white glitter foam
- Using your hot glue gun, glue these down to the black fabric, arranging them so that there is one row of top teeth and one row of bottom teeth
- Leave a border between the teeth and the rim of the mask
- Glue one layer of Festv Feathers in green around the border, placing the feathers sideways so they create a frame around the mask
- Cut a tongue shape from the pink felt
- Measure a length of fine wire that will wrap around the outside of the tongue
- Glue this down to the underside of the tongue
- Once dried, gently bend the wire, creating a curve in the tongue so that it will stick out slightly once attached to the mask
- Attach the tongue to the bottom left corner of the mask with your hot glue gun, in line with the bottom of the lower level of teeth
- Add another layer of Festv Feathers, going over the top of the underside of the tongue to hide any messy edges or dried glue
- Trim around the edges of the feathers to neaten them and to give a nice, full finish
