# Merry and Bright Christmas Wreath

how to  
make

## DIFFICULTY ●●●

Approximate Time of Project: 3hours

## MATERIALS

2x Deco Foam Wreath 35cm  
Red Ribbon  
Red Baubles, large, medium and small  
Gold Baubles, large, medium and small  
Silver Baubles, large, medium and small  
Toothpicks  
Christmas lights/including batteries

## EQUIPMENT

Glue gun  
Scissors

## STEPS

1. Glue the 2 deco foam wreath together.
2. Slip the ribbon around the wreath and knot it about 1 inch from the ends to form a long loop to hang from.
3. Remove the gold piece from the top of the large baubles. Place a toothpick into the foam where you would like the bauble to be. Squeeze glue around the top of the bauble and place it over the toothpick. Use large baubles to fill in the center and the outside of the wreath first.
4. Don't remove the gold piece from the top of the medium and small baubles. Use the medium and small baubles to fill in the gaps by gluing them to the other baubles. Repeat this for the entire bauble wreath making sure you alternate between large, medium and small bauble.
5. Secure the Christmas lights with hot glue around the wreath and keep the battery pack hidden at the back.
