Simple Beanie with
Ribbed Hem

EASY MACHINE KNIT

Our knitting machine makes knitting in the round a breeze, by minimising the amount of hand manipulation required, these beanies take no more than an hour to make. Which makes this pattern perfect for gift giving or knitting for charity. Before commencing this pattern, knitters should have basic knowledge of knitting rib in the round, casting off and of course, the operation of their Lincraft knitting machine.

MEASUREMENTS

One Size Fits Most

Fits Head Circumference Up To	cm	58
-------------------------------	----	----

Yarn Required:

Makr Venture	100g balls	1
--------------	------------	---

Please use only the yarn specified. Another yarn is likely to yield different results. Quantities are approximate as knitting styles may vary between knitters. Check the ball bands to ensure all yarn is from the same dye lot.

DIFFICULTY ●●●

NEEDLES & EQUIPMENT:

A Lincraft circular knitting machine.
A 5.00mm circular knitting needle, 80cm or longer.
A length of waste yarn approximately 1 metre long.
Pom pom maker.
Approximately 50g of yarn for pom pom.
Wool needle for sewing in ends.

TENSION:

Tension is predetermined by your knitting machine tension guide.

BEANIE

Casting on your machine:

Assemble the machine as per the included instructions, place the machine on a stable surface.

Make sure the operating switch is up and set for circular or tube knitting rather than panel knitting.

Finding the centre pull of the yarn, take the tail end and place into the centre of the machine so that it touches the table.

Turn the crank backwards until the first black needle is to the left of the yarn feeder. Wrap the working end of your yarn in front of the needle. Start slowly turning the crank clockwise and at the same time, thread the yarn behind the next needle, then in front of the next, continuing to alternate back and forth on each rising needle.

When you reach the first needle you've threaded again the yarn remains wrapped in front of the needle for the remainder of the work.

Thread your yarn through the yarn holder so that it sits firmly in place.

Thread through the middle hole of the tension guide and back up through the end hole. You may have to adjust the tension depending on your individual machine. Now you are ready to knit!

Knitting Panel:

Continue to turn the crank backwards, do not use excessive force, the yarn should run smoothly through the machine.

Occasionally tug at the bottom of the work to keep the work feeding smoothly through the machine. Continue to knit until piece measures 23cm from the beginning, remove the yarn from the tension guide and yarn holder.

Removing Tube for Ribbing:

Using the length of waste yarn and the needle included with your machine, thread the yarn through each stitch, alternating between threading through the stitch from the front and the back. When you reach the starting stitch again, remove the work from the machine.

Slip the final row of stitches onto your circular needles, taking care to keep the tube facing the same direction.

Remove the waste yarn, beginning to knit in the round following the below stitch pattern,

Round 1: *Knit one stitch, purl one stitch, repeat from * to end of the round.

Repeat this round until ribbing measures 5 cm from the beginning.

Cast off loosely in rib.

FINISHING

Tug the end of yarn at the beginning of the work to draw tightly and fasten off.

If desired, make and add a pom pom, using the extra end of yarn to sew it in place at the crown of the head.

Weave in all ends, fold back the cuff and stretch gently into shape.

ITEM A: Ribbed Hem on Beanie
