

how to
make

Votive jar

#A355

YOU WILL NEED

- Swing top storage jar
- Scrapbooking paper (thin kind is better for this project)
- A decorative Punch
- Mod Podge
- A decorative Punch
- Mod Podge
- Brush
- An electric candle or Tea light candle

Using the decorative punch, and your choice of scrapbooking paper, punch out shapes. Brush mod podge onto the face of each shape and press it to the inside of the jar. You could also brush mod podge on the inside of the shape to protect it if you choose but be careful not to get it on the jar itself.

Tie a length of ribbon around the neck of the jar and insert the candle.

If you are using tea lights – you will need to keep the lid of the jar open at least a little way for oxygen to get in. An electric candle is a safer and more reliable option.
