

how to
make

PVA Glue
Slime

#A447

YOU WILL NEED

- ☐ PVA Glue
- ☐ Borax
- ☐ Glitter
- ☐ A Spoon
- ☐ Gloves
- ☐ A Bowl
- ☐ Warm Water
- ☐ Food Colouring

CAUTION

**THIS PROJECT USES BORAX
WHICH MUST BE HANDLED
BY ADULTS**

DIFFICULTY ● ● ●

INSTRUCTIONS

NOTE: Ensure you have gloves on when handling the borax.

Step 1: Using a bowl, begin with 250ml of PVA glue and 1/4 cup of water.

Step 2: Mix well together.

Step 3: For colour and sparkle, add a few drops of food colouring and glitter. Mix well.

Step 4: Add 1 teaspoon of borax to 1 cup of warm water and mix.

Step 5: Use the teaspoon to add in only one teaspoon at a time to the glue and water mixture. Keep adding borax to the mixture, one teaspoon at a time. Continue stirring throughout.

Step 6: When the mixture gets hard to stir, work it in your hands until it is less sticky. This is messy but necessary for the two compounds to bond completely.

FINISHING

When not in use, store your slime in a snap lock bag in the fridge.
